ZKBioSecurity Visitor Management Solution

Functions
- Web-based Server which Supports multiple registration sites.
- Web-based Visitor Reservation Management
- Seamless Integration with Access Control, Elevator Control, Video Linkage, Parking etc...
- E-Mail and SMS Notification for the Visitors/Host and Administrators
- Supports Visitors Watchlist for Specific People/Group/Nation
- Supports OCR or ID Card reader to Auto-fill the Visitor’s Basic Info
- Supports Customized the Size/Format of Visitor Badges, including Receipts/Sticker/Printed Card
- Supports Combination Verification Modes with Biometrics for Visitors: Card/Fingerprint/Password/Barcode/QR-Code etc.
- Supports Recording the Visitors’ Signatures Pictures
ZKBioSecurity Visitor Management Solution

ZKBioSecurity Visitor Management Solution offers access registration, checking out, photo capturing, visitor number counting, and visit registration and mutual information sharing of registration points etc. functions to visitors. It is highly integrated with access control and elevator control systems etc., and provides simple yet effective and professional visitor management methods.
Visitor Management Process

Visitors can make reserved registration through booking function, successful reservation information will be delivered via email or SMS to notify recipients, visitors and registration managers etc. Visitor registration can also be done by identity card registration (OCR or ID Reader), signature, photo capturing, passport capturing or car information registration etc. in order to enhance the safety level. Visitor authority supports Automatic distribution of recipient department authority group according to visitor’s location. Also, copying function enables users to select needed visitor information and copy to new registration interfaces, including recipient information, reasons for visit, corporate information, authority information etc., which bring convenience and saved time to group visit registration. After successful registration, visitors may have access to designated areas with visitor cards or visitor receipts. It supports card, password, fingerprint, QR code etc. multiple verification methods. After visit, visitors may return cards in the registration point for checking out.

Multi-point Visitor Registration Management System based on Web

Supports setting of visitor registration points, multi-point registration visitor management, and mutual sharing of a publicized management database.
Visitor Receipt and Customized Card Printing Functions
Supports customization of visitor receipt or visitor card template setting, and enables visitor information and corporate logo printing and template preview etc. After successful registration, key visitor message in own template format can be printed on customized visitor receipts or cards, small tickets or customized cards are both optional for visitors’ use.

High-speed Portable HD Doc Scanner Supports Visitor Portrait Capturing + Passport Photo + OCR Recognition
During visitor registration, it supports one-click capture of visitors’ portrait image, passport photo and saving, and uses OCR function to automatically read identity document (identity card, passport etc.) and fill in effective information in order to realize quick registration.

Supports Connection to Signature Pad and Auto-Acquisition of Visitors’ Signature
Visitor registration points support electronic signature board. During registration, signature records will be automatically saved to visitor system upon successful signature, and printed on customized card printing template, it is also optional to print signatures on visitor cards. After successful visitor registration, visitor cards with printed signature can be instantly printed.
Visitor and Entrance Channel (Flap Barriers etc.) Integration
With the integration of entrance channel and QR code reader, upon successful visitor registration, visitor receipt can be printed by receipt printer, visitor receipt supports customized template setting, including visitor information barcode or QR code to be printed, with these visitors are able to have access to designated areas upon successful verification.

Visitors Car Information Management
During visitor registration, it supports registration of visitor car information including brand, license plate, color and model etc.

Watch List Function
Watch lists are categorized into 3 types: Individual, Company, and Country. Monitoring lists can be generated upon needs, for reception convenience. It supports central management through adding new visitors or previous visitor to watch lists, and is able to mark VIP, KEO (Keep an eye on) or black-listed. During visitor registration, monitoring information in the system will be matched for further operation by registration manager, e.g. special care taking for VIP, and denial of blacklisted access etc. It is able to perform quick search to individual watch list information and editing of setting.
E-mail and SMS Notification Functions

During visitor registration, in case of overtime visits, visitor registration, overtime visitor registration, visitor checking out, monitoring lists, the system will deliver e-mail or SMS notification to visitors, recipients or managers in registration points. SMS and e-mail templates supports customization, templates with different contents, delivery rules and recipients according to conditions can be customized. If it is set to deliver in day of visit, all notifications will be delivered to the specific recipients on specific time.

Visitor + Access Control + Elevator Control (Standard or DCS Integration) + Video Linkage One-stop Solutions

ZKBioSecurity3.0 is the ultimate “All in One” web based security platform developed by ZKTeco. It contains many integrated modules: access control, elevator control, video linkage, visitor management, parking system etc. It provides the most advanced solution for a whole new user experience.

Global Linkage - Monitoring Video Pop-up

The security linkage system comprises a video monitoring system, when there is an exceptional event, including a swiping of an unauthorized card on the card reader, monitoring video will pop up to warn administrator. Video length could be up to 180 seconds.
**Integrated Elevator Control (DCS) Solution**

By integrating our turnstile solutions with our normal and destination based dispatching elevator control system, you will benefit from consistent design, flexible personalization features, and enhanced comfort for visitors and tenants.

1. Present card on the entrance control
2. Present card on the elevator
3. Enter the elevator
4. Elevator will go upward/ download to the destination

---

**Elevator Operation Limitation by Timeslots**

ZKTeco Elevator Control is able to limit elevators’ operation in specific time. For actual implementation, if the elevator control was set to stop operating to go upward between 9:00 p.m. to 7:00 a.m., Unauthorized persons will only be allowed to go downward even with cards for Door access.

---

**9:00pm - 7:00am**
**Going Upward Disallowed**

Elevator Floor Assigned

---

**9:30pm**

---

**9:30pm**
G3
Multi-Biometric Time Attendance & Access Control Terminal
- Modern Design & Interactive UI
- Revolutionary SilkID Fingerprint Sensor
- Simple Management & Scalability
- Multiple Verification Modes: Face / Fingerprint / Card / Password
- Outstanding Performance With Dry, Wet and Rough Fingers

ProBio
Multi-Biometric Access Control Terminal
- Multiple Verification Modes: Face / Fingerprint / Card / Password
- Dry, Wet and Rough Fingers
- SilkID Fingerprint Sensor
- Built In Camera: Event Snapshot and User Photo

EC10
Elevator Control Panel
- Secure, scalable and versatile...
- Elevator Controls and Expansion Boards
PB3000
Parking Barrier
- Compact design, convenient for packing and lowering delivery cost
- ZK designed rolling pressure spring technology, extending product life

BS-54N11K
H.265 4MP Bullet IP Camera
- 4.0MP, H.265
- 1/3” Sony CMOS, WDR
- IR: 20M
- ONVIF
- IP67
- P2P, Mobile View
All In One Web Based Security Management Solution

Features:

- Web Based Platform
- Neat and Tidy, Simple User Friendly UI
- Supports 3rd Party Video Device
- All-In-One Solution
- Email Notifications
- Global Anti-Passback and Linkage
- Many Doors Management Capacity
- Data Auto-Backup Function
- Huge Data Processing Capability

- Jail Location E-map (Adjustable)
- Precise Real Time Monitoring
- Access Control Linkage With Multi Modules (Video Surveillance, Alarm, Elevator)
- HTTPS Web Security Protocol
- Accurate Check for Innate Location
- Video Surveillance Module (Fully Supports HIK Vision/Dahua and ONVIF)
- Elevator Control
- Full Functioned Visitor Module
**HTTPs Web Security Protocol**
- SSL/ TLS every Encrypteel
- Prevents eavesdroppings and man-in-middle attacks

**Precise Real Time Monitoring**
- Flexible and expandable design
- Remote opening and closing lock down control
- Pop-up alarm notification
- Automatic determines who is/ are inside the specific area

**Jail Location E-map (Adjustable)**
- Supports multiple floor location display
- Supports device status notification
- Drag and drop layout designing
- Real time monitoring

**Access Control Linkage With Multi Modules**
- Supports multi module linkage
- Access control, video surveillance and elevators
- Supports more than 100 linkage combinations
- Supports email notification for all events

**Accurate Check for Innate Location**
- Able to check who is inside in particular area
- Check for the last access location

**Video Surveillance Module**
- Fully Supports ZKTeco, HIKVision and Dahua video surveillance
- Supports ONVIF
- Interactive with access control and elevator system with various output options
- Up to 30sec pre-event recording function

**Elevator Control**
- Supports up to 50 Floors
- Supports multiple access authority setting
- Multiple event types can be defined

**Full Functioned Visitor Module**
- Online Registration
- Supports OCR and USB Camera
- Visitor Time Schedule Setting
- Detailed visitor reports
The Leader Of Security And Time Management Solution

Fingerprint Recognition  Face Recognition  Palm Recognition  Finger Vein Recognition  Iris Recognition  Card Recognition
