Quick Start Guide

FaceDepot-7A

Version: 1.0
Date: Nov. 2018
Overview

Device Installation

Method 1: Installation on the floor

Please route the wire through the bracket 1 and connect it before installation.

1. Fix the device on the bracket 1.
2. Insert the bracket 1 into the bracket 2 and fix it with screws. The height of camera from the ground is recommended to be 1.55m.
3. Fix the bracket to the ground with 4 screws.

Please install the sun canopy above of terminal once strong light environment.
**Method 2: Install on barrier gate**

Please route the wire through the bracket before installation.

1. Fix the device on the bracket.
2. Drill a hole on the barrier gate. Insert the bracket into the hole and fix it with a nut.

4 Quick Start

User registration

Step 1
- Login onto http://X.X.X.X:XX/app/v1/adreg with mobile phone to register users.
- Click [Personnel] > [Person] > [New] to register users in ZKBiosecurity Software.
- Register users on the device.

Step 2. Click [Access Device] > [Device] > [New] to add the device to the software.
Step 3. Add users to access levels.
For more details, please refer to the ZKBiosecurity User Manual.

User authentication

When the distance between the person and the machine is 1.5m, the device will automatically switch to the face verification interface. The verification result is as shown on the right:

Verification is successful

The device will automatically switch to the standby page if it doesn’t detect any person within 5 seconds.
The icons ⌂ or ⌊ in the standby interface indicates that the network connection or the server is abnormal. Please check the network cable and network connection.
