PB4000 series parking barrier adopts die-casting aluminum alloy motor and extraordinary structural design, it offers not only a long-life cycle, high reliability and quality, but also reduces the difficulty of equipment maintenance. It is an ideal choice for vehicle entrance control management.

Features
- Support external infrared radiation and vehicle loop detector for anti-crash function
- Die-casting aluminum alloy motor with double strong springs makes the operation more stable
- Wheel manual release in case of power cut, rotate the wheel manual release on the bottom of the motor to raise the boom manually
- The housing with modularized design is made of powder coated steel which offers best protection against corrosion
- Built-in cooling fan, solving the problem of heat-protection, operating temperature of motor ranged from -40°C—+140°C

Product Details
PB4000 series

- 4m / 6m telescopic boom
- 3s / 6s opening & closing speed
- Length of boom is easy to adjust, suitable for different lane width

PB4030-LED series
- 4m straight boom with led light
- 3s opening & closing speed

PB4130 series
- 3m 90° folding boom
- 3s opening & closing speed
- Suitable for underground car park
