Part One: Function List

1. Personnel
   New added Personnel Type, Worker Type and Company Information.

   1) Person Type: It includes the Fixed Employee and Temporary Employee.
2) Worker Type: It includes several different types of worker which can will use in the Construction site.

3) Company: Company information can be set in this option.
2. Area Monitoring

The new module in this software is Access - Advanced Functions - Area Monitoring. User can check LCD real-time monitoring in this module. (User should define the zone and the reader first.)

Part Two: Function operation instructions

Function1:

Added personnel type selection, worker type selection and company selection in the Personnel interface.
Testing Procedures:

Click [Personnel] > [Person] > [New] > [Personnel Type] and you can choose which type you want set.

Click [Personnel] > [Worker Type] > [New], you can add the new worker type and they will display in the person edit interface.
Click [Personnel] > [Company] > [New], you can add the new company and they will display in the person edit interface.

**Function2:**
Enables real-time monitoring of channel flow

**Testing Procedures:**
Click [Access Device] > [Device] > [New] on the Action Menu, the following interface will be shown:
When you add the device, they will display in the Device interface, and you can see State and number of doors in the Real-Time Monitoring interface.
Click [Access Control] > [Time zones] > [New] to enter the time zone setting interface, in this interface you can set the access time-period.

Access levels indicate that one or several selected doors can be opened by verification of a combination of multi person within certain time zone. The combination of multi person set in Personnel Access Level option.
1. Click [Access Control] > [Access Levels] > [Add] to enter the Add Levels editing interface:
2. Set each parameter: Level Name (unrepeatable), Time Zone.
3. Click [OK], the system prompts “Immediately add doors to the current Access Control Level”, click [OK] to add doors, click [Cancel] to return the access levels list. The added access level is displayed in the list.

Note: Different doors of different panels can be selected and added to an access level.

Advanced Functions:

If you want to use the Site Monitoring, first please set the BG-verification options for device, it means enable the background verification, then set he relevant parameters such as Zone and Reader Define. Finally, you can see the situation about the Real-Time Monitoring of channel personnel.
Zone:

It mainly used partition Zones in advanced access control. When using advanced functions such as Global or our new function site monitoring, you must define Access Zones.
