**ZKTeco** is a registered trademark of ZKTeco. Other trademarks involved in this manual are owned by their respective owners.

## Disclaimer

This manual contains information on the operation and maintenance of the ZKTeco equipment. The copyright in all the documents, drawings, etc. in relation to the ZKTeco supplied equipment vests in and is the property of ZKTeco. The contents hereof should not be used or shared by the receiver with any third party without express written permission of ZKTeco.

The contents of this manual must be read as a whole before starting the operation and maintenance of the supplied equipment. If any of the content(s) of the manual seems unclear or incomplete, please contact ZKTeco before starting the operation and maintenance of the said equipment.

It is an essential pre-requisite for the satisfactory operation and maintenance that the operating and maintenance personnel are fully familiar with the design and that the said personnel have received thorough training in operating and maintaining the machine/unit/equipment. It is further essential for the safe operation of the machine/unit/equipment that personnel have read, understood and followed the safety instructions contained in the manual.

In case of any conflict between terms and conditions of this manual and the contract specifications, drawings, instruction sheets or any other contract-related documents, the contract conditions/documents shall prevail. The contract specific conditions/documents shall apply in priority.

ZKTeco offers no warranty, guarantee or representation regarding the completeness of any information contained in this manual or any of the amendments made thereto. ZKTeco does not extend the warranty of any kind, including, without limitation, any warranty of design, merchantability or fitness for a particular purpose.

ZKTeco does not assume responsibility for any errors or omissions in the information or documents which are referenced by or linked to this manual. The entire risk as to the results and performance obtained from using the information is assumed by the user.

ZKTeco in no event shall be liable to the user or any third party for any incidental, consequential, indirect, special, or exemplary damages, including, without limitation, loss of business, loss of profits, business interruption, loss of business information or any pecuniary loss, arising out of, in connection with, or relating to the use of the information contained in or referenced by this manual, even if ZKTeco has been advised of the possibility of such damages.

This manual and the information contained therein may include technical, other inaccuracies or typographical errors. ZKTeco periodically changes the information herein which will be incorporated into new additions/amendments to the manual. ZKTeco reserves the right to add, delete, amend or modify the information contained in the manual from time to time in the form of circulars, letters, notes, etc. for better operation and safety of the machine/unit/equipment. The said additions or amendments are meant for improvement /better operations of the machine/unit/equipment and such amendments shall not give any right to claim any compensation or damages under any circumstances.

ZKTeco shall in no way be responsible (i) in case the machine/unit/equipment malfunctions due to any non-compliance of the instructions contained in this manual (ii) in case of operation of the machine/unit/equipment beyond the rate limits (iii) in case of operation of the machine and equipment in conditions different from the prescribed conditions of the manual.

The product will be updated from time to time without prior notice. The latest operation procedures and relevant documents are available on <http://www.zkteco.com>.

If there is any issue related to the product, please contact us.

## About the Company

ZKTeco is one of the world's largest manufacturer of RFID and Biometric (Fingerprint, Facial, Finger-vein) readers. Product offerings include Access Control readers and panels, Near & Far-range Facial Recognition Cameras, Elevator/floor access controllers, Turnstiles, License Plate Recognition (LPR) gate controllers and Consumer products including battery-operated fingerprint and face template-reader Door Locks. Our security solutions are multi-lingual and localized in over 18 different languages. At the ZKTeco state-of-the-art 700,000 square foot ISO9001-certified manufacturing facility, we control manufacturing, product design, component assembly, and logistics/shipping, all under one roof.

The founders of ZKTeco have been determined for independent research and development of biometric verification procedures and the productization of biometric verification SDK, which was initially widely applied in PC security and identity authentication fields. With the continuous enhancement of the development and plenty of market applications, the team has gradually constructed an identity authentication ecosystem and smart security ecosystem, which are based on biometric verification techniques. With years of experience in the industrialization of biometric verifications, ZKTeco was officially established in 2007 and now has been one of the globally leading enterprises in the biometric verification industry owning various patents and being selected as the National High-tech Enterprise for 6 consecutive years. Its products are protected by intellectual property rights.

## About the Manual

This manual introduces the operations of **ZKBio Zexus Mobile App**.

All figures displayed are for illustration purposes only. Figures in this manual may not be exactly consistent with the actual products.

Features and parameters with ★ are not available in all devices.

## Document Conventions

Conventions used in this manual are listed below:

### GUI Conventions

For Software	
Convention	Description
<b>Bold font</b>	Used to identify software interface template names e.g. <b>OK</b> , <b>Confirm</b> , <b>Cancel</b> .
>	Multi-level menus are separated by these brackets. For example, File > Create > Folder.

For Device	
Convention	Description
< >	Button or key names for devices. For example, press <OK>.
[ ]	Window names, menu items, data table, and field names are inside square brackets. For example, pop up the [New User] window.
/	Multi-level menus are separated by forwarding slashes. For example, File/Create/Folder.

### Symbols

Convention	Description
	This represents a note that needs to pay more attention to.
	The general information which helps in performing the operations faster.
	The information which is significant.
	Care taken to avoid danger or mistakes.
	The statement or event that warns of something or that serves as a cautionary example.

## Overview

Stay connected to your ZKBio CVSecurity or ZKBio CVAccess system anytime, anywhere with ZKBio Zexus. Access your access control, video intercom system, and more features on the go. Since ZKBio CVAccess is the lite version of ZKBio CVSecurity, the functionality of the Mobile APP differs when connecting to different systems. Here is a comparison list of features:

Function		ZKBio CVAccess	ZKBio CVSecurity
Mobile APP	Admin APP	Remote Lockdown	✓
		Remote Control	✓
		Access Statistics Report	✓
		Video Intercom (Sip)	✓
		Visitor Registration	✗
		Visitor Status Statistics	✗
		Visitor Statistics	✗
		Elevator Unlock	✗
		Personnel Registration	✓
Mobile APP	Personnel APP	My Credentials (QR)	✓
		Video Intercom (Sip)	✓
		Visitor Invitation	✗
		Elevator Unlock	✗
		Book Space	✗
		My Activities	✗
		Space Service	✗

Please note: If you require more features, please upgrade your ZKBio CVAccess to ZKBio CVSecurity.

## Preconditions

- ZKBio CVSecurity version requirement: V6.1.0\_R and above.
- ZKBio CVAccess version requirement: V4.2.0\_R and above.
- ZKBio CVConnect version requirement: V1.2.0 and above.

Please note: The administrator must first bind ZKBio CVSecurity/ZKBio CVAcces with ZKBio CVConnect before the members within the company can start using the Mobile APP.

## 1 ZKBio CVConnect Introduction

ZKBio CVConnect is a sub-service of Minerva IoT, and its main function is to serve as a communication medium, allowing local application data to be accessed externally without altering the internal network structure.

With ZKBio CVConnect, the ZKBio CVSecurity/ZKBio CVAcces server installed on your intranet can be used to bind to the Mobile App.

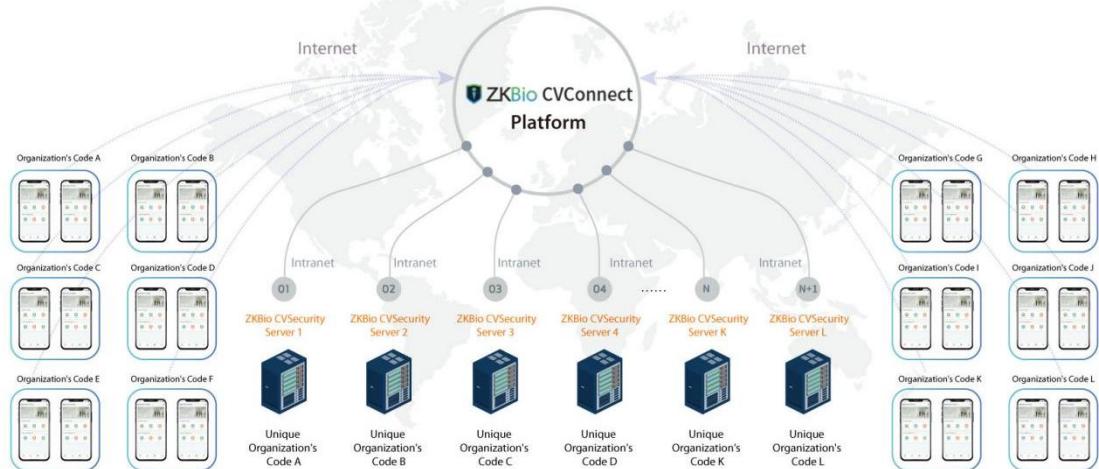

Figure 1 ZKBio CVConnect Introduction

## 1.1 ZKBio CVConnect Client Installation

**Step 1.** Download the ZKBio CVConnect client and double-click it to start installation.

**Note:** You can go to the **ZKBio CVSecurity - System Management - Cloud Settings** page and click on **ZKBio CVConnect Client** to download.

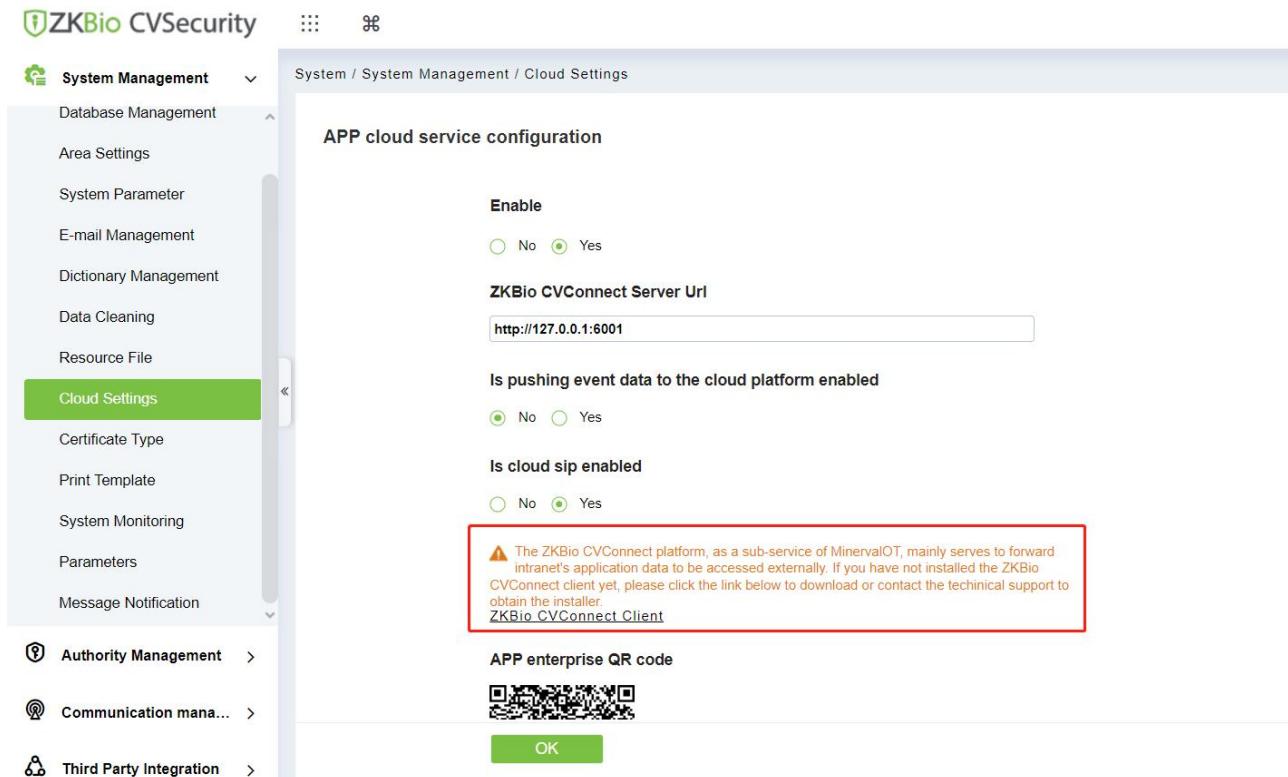

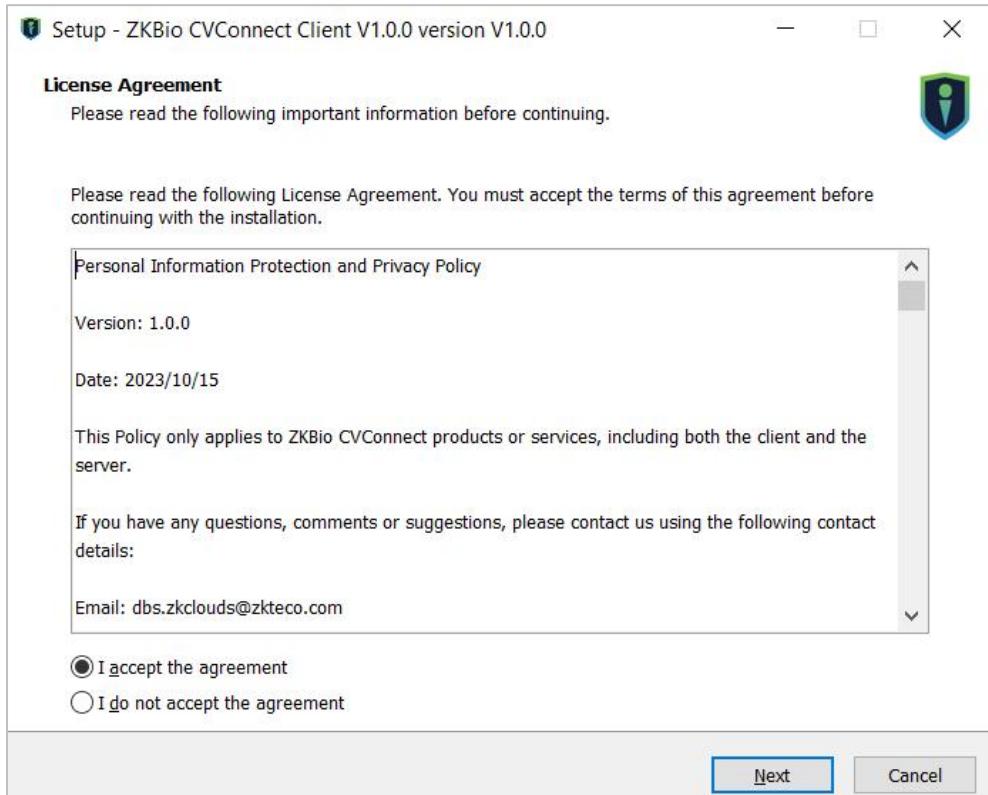

Figure 2 ZKBio CVSecurity System Management

**Step 2.** Select the language, currently supports English, Spanish and Simplified Chinese.

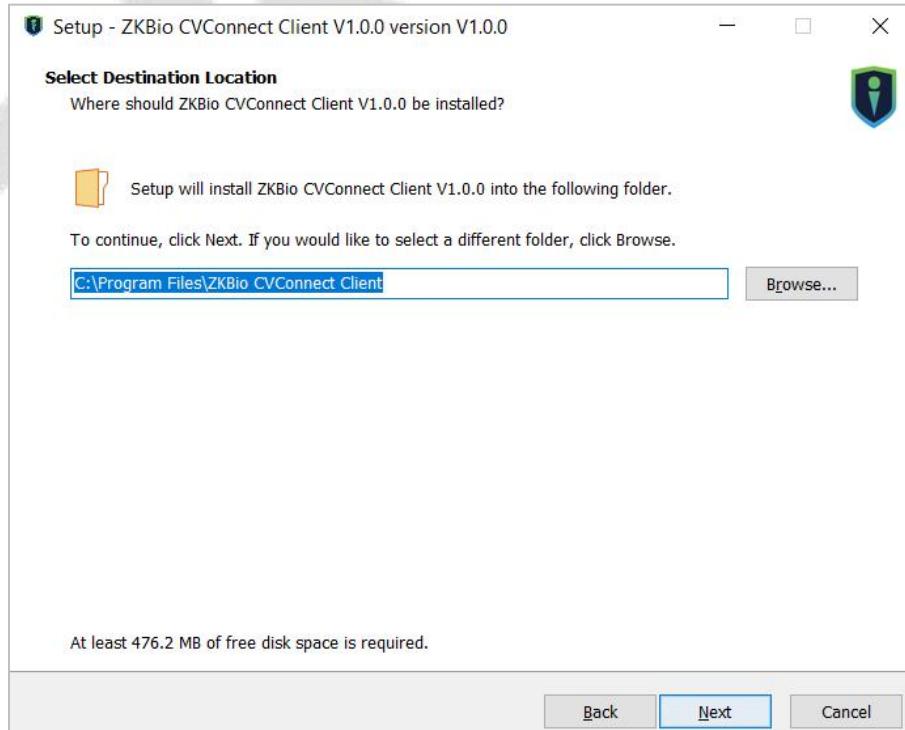

Figure 3 Setup Language

- 1) Please read carefully and agree to the License Agreement, then click **Next**.

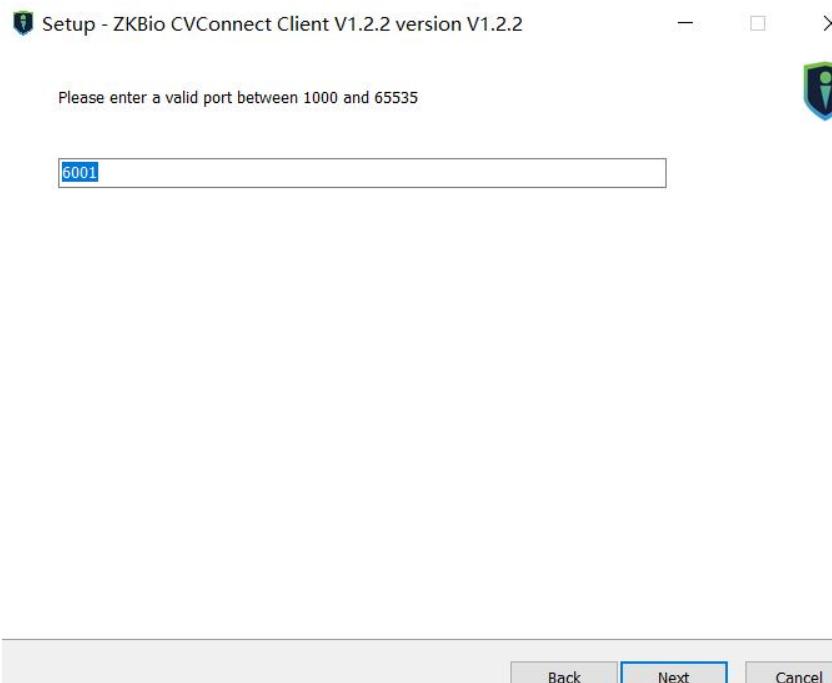

**Figure 4 License Agreement**

- 2) Configure the installation path, then click **Next**.

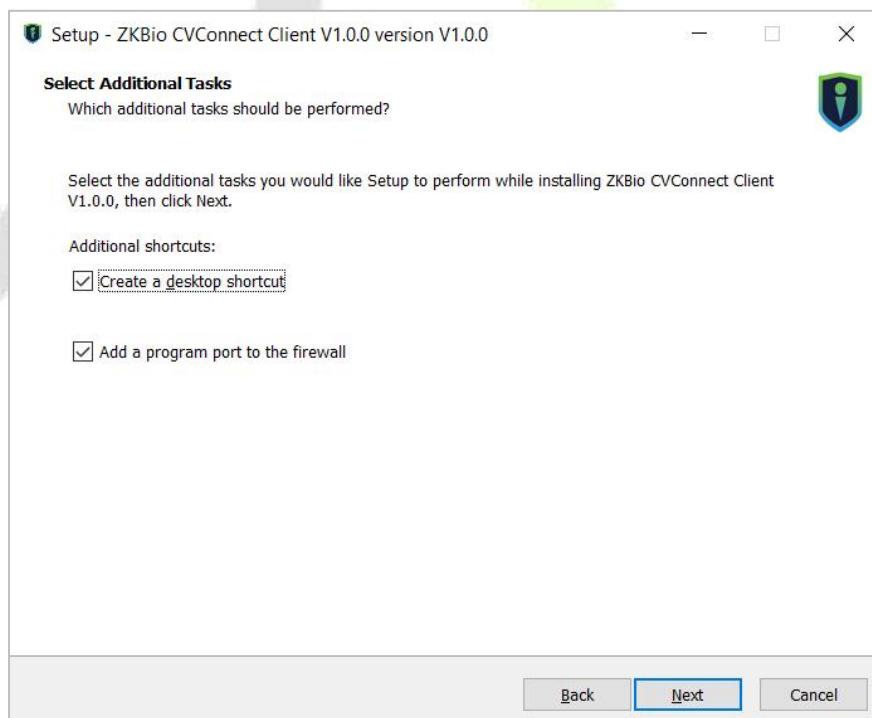

**Figure 5 Install Path**

3) Configure the port number for CVConnect, which is 6001 by default. Then click **Next**.

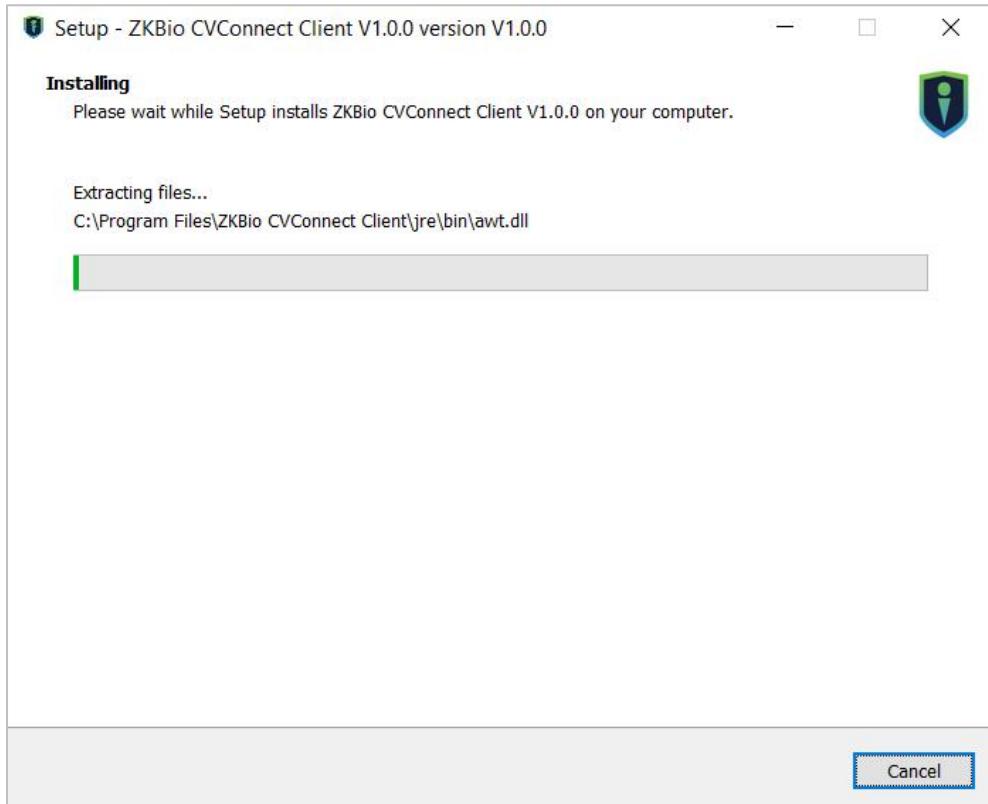

**Figure 6 Configure Port**

4) Select to create a desktop shortcut and add a program port to firewall, then click **Next**.

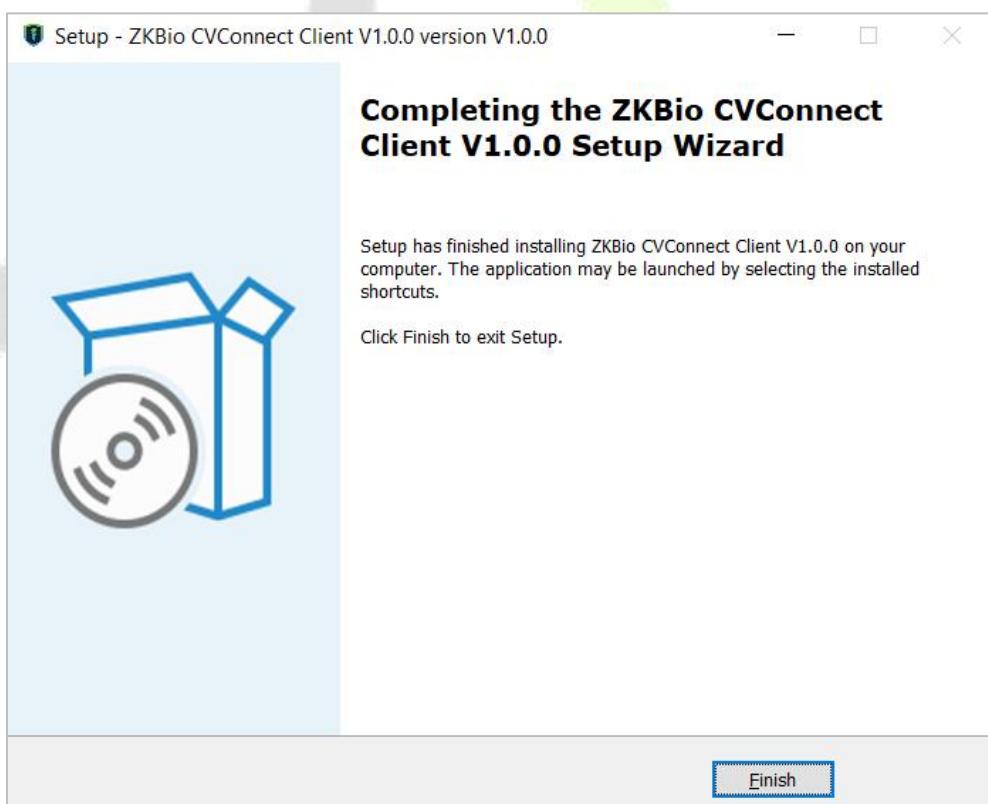

**Figure 7 Create Desktop Icon**

- 5) Click **Install** until the installation is complete.

**Figure 8 Installing**

**Figure 9 Install Completed**

## 1.2 ZKBio CVConnect Activation

**Step 1.** Double-click the desktop shortcut key. Jump to browser page.

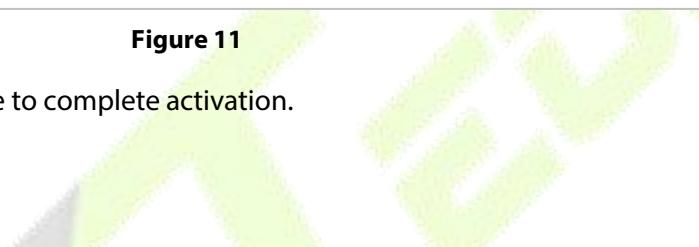

**Figure 10 Desktop Shortcut Key**

**Figure 11**

**Step 2.** Follow the steps on the page to complete activation.

### 1.2.1 Select Area

 A screenshot of the 'Please select area' step of the activation process. The page has a light gray background with a header 'ZKBio CVConnect Activation' and a sub-header 'Activation code activation >>'. Below this, a note states: 'ZKBio CVConnect is a service based on ZKTeco MinervaloT platform. Activating ZKBio CVConnect requires registering as a MinervaloT user and creating a company. One cloud account can bind multiple ZKBio CVConnect services, but one company can only bind one set of ZKBio CVConnect services.' The main form area has four numbered steps: 1. Please select area, 2. Bind ZKBio CVConnect account, 3. Select company, and 4. Activation waiting. Step 1 is active. It contains three input fields: 'Area' (a dropdown menu), 'Local Application' (a dropdown menu set to 'ZKBioCVSecurity'), and 'Endpoint' (a text input field containing 'https://127.0.0.1:8098'). A 'Next' button is at the bottom right.

**Figure 12 ZKBio CVConnect Activation**

- Area:** Select the area of the cloud server, currently only China, Singapore and America are available, other areas will be added later.
- Local Application:** Based on your actual application selection, currently supported are ZKBio CVAccess and ZKBio CVSecurity.
- EndPoint:** The server address of your local application. For example, if your local application is ZKBio CVSecurity with a server address of <https://192.168.1.101:8098>, enter this server address here so that ZKBio CVConnect can correctly forward the data from your local server for access by the Mobile APP.

## 1.2.2 Bind ZKBio CVConnect Account

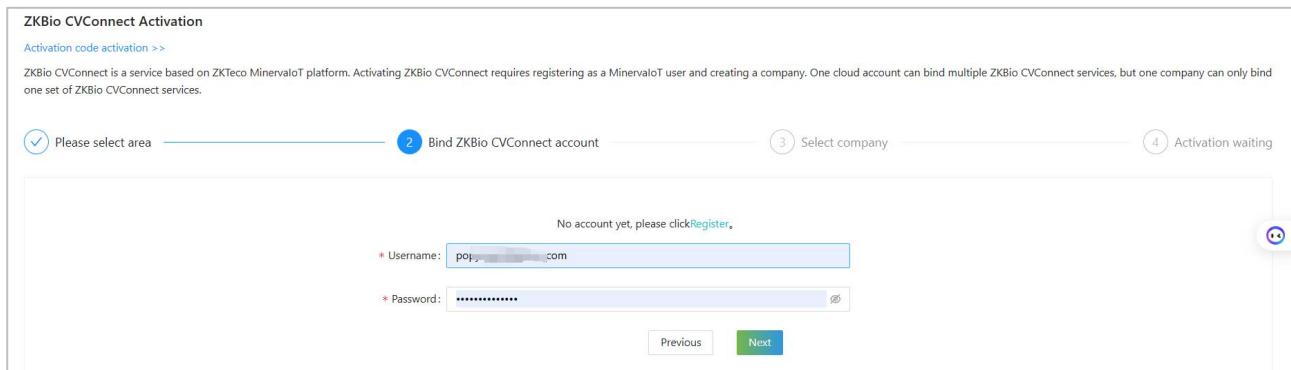

Figure 13 ZKBio CVConnect

If you already have a Minerva IoT account, you can use it and log in; otherwise click on **Register** ( **No account yet, please click Register.** ), then jump to Minerva IoT registration page and register your account.

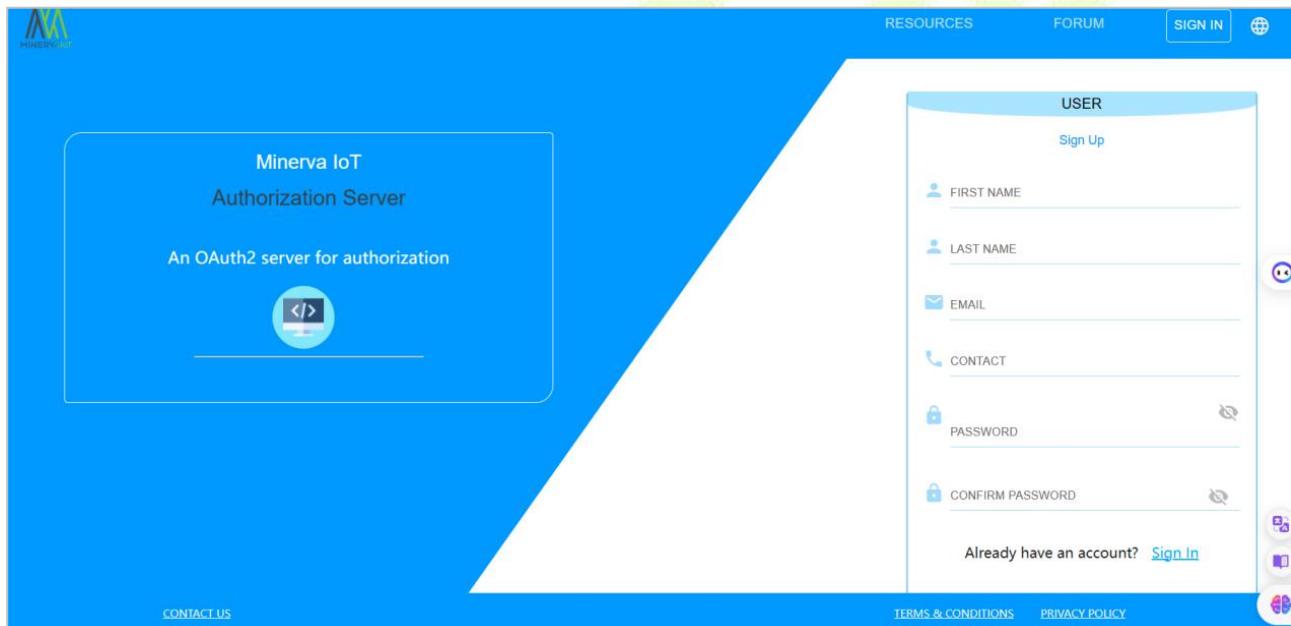

Figure 14 Account Register

### 1.2.3 Select Company

Hybrid Cloud Activation

Activation code activation >>

ZKBio Hybrid is a service based on ZKTeco MinervaloT platform. Activating Hybrid Cloud requires registering as a MinervaloT user and creating a company. One cloud account can bind multiple Hybrid Cloud services, but one company can only bind one set of Hybrid Cloud services.

1 Please select area 2 Bind Hybrid Cloud account 3 Select company 4 Activation waiting

**Figure 16 Create Company**

Start Activating and wait for 1-2 minutes until the Activation completely.

Hybrid Cloud Activation

Activation code activation >>

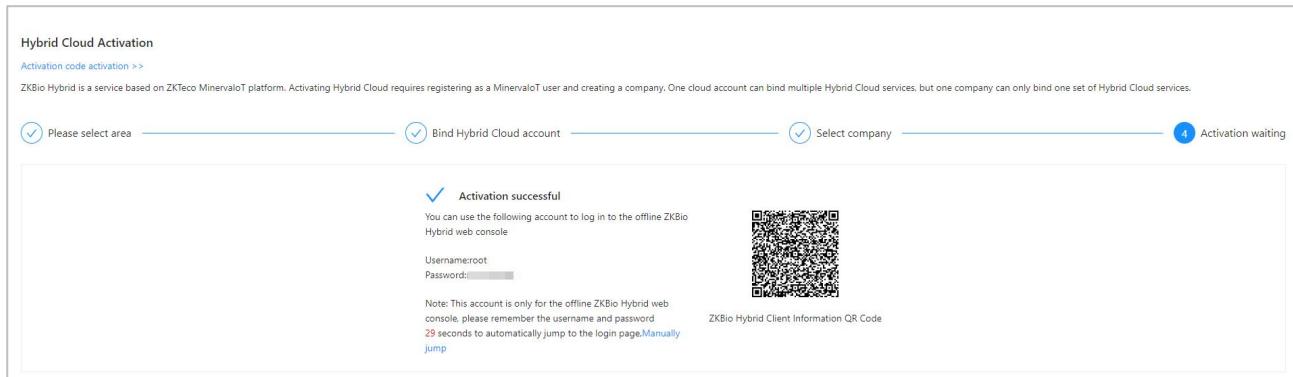

ZKBio Hybrid is a service based on ZKTeco MinervaloT platform. Activating Hybrid Cloud requires registering as a MinervaloT user and creating a company. One cloud account can bind multiple Hybrid Cloud services, but one company can only bind one set of Hybrid Cloud services.

1 Please select area 2 Bind Hybrid Cloud account 3 Select company 4 Activation waiting

Activating

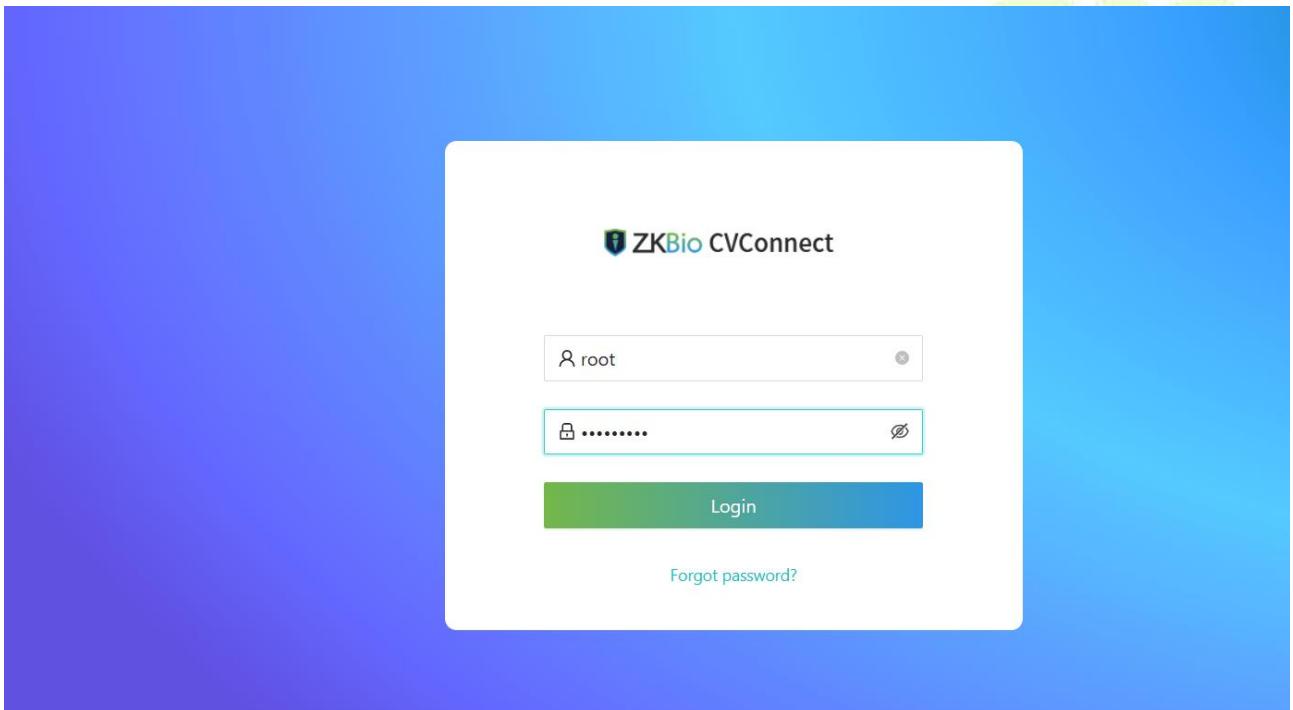

**Figure 17 Waiting Activation**

After activation successful, you can get the organization's QR Code (Be sure to save your organization code, the mobile app requires it to be scanned in order to log in).

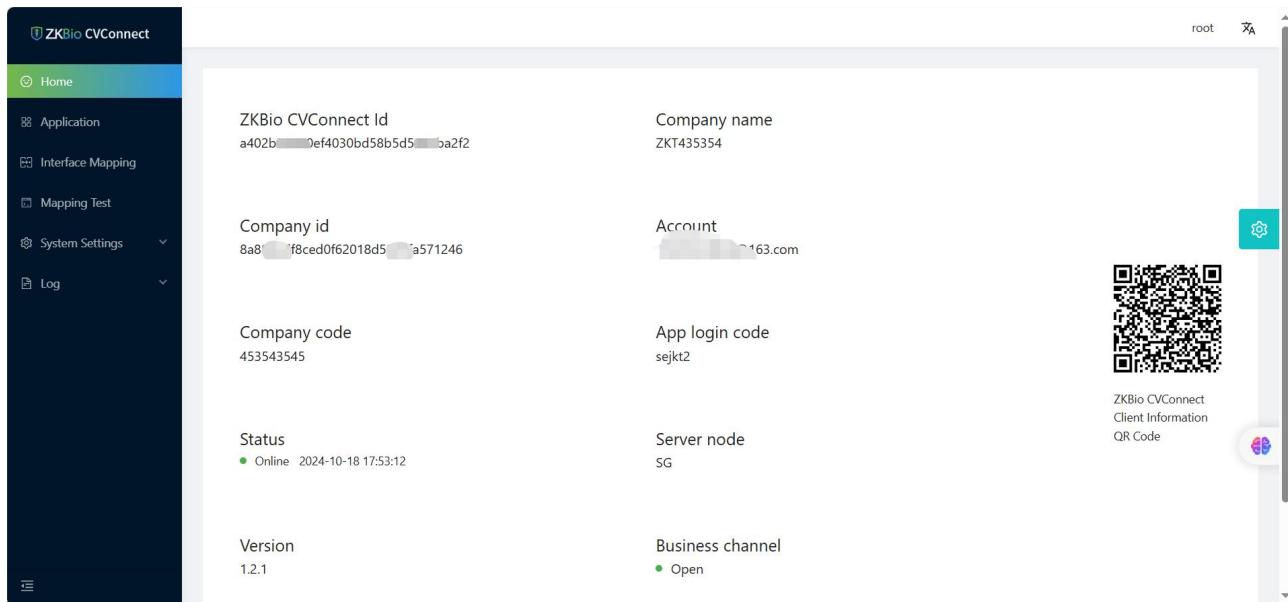

**Figure 18 Activation Successful**

Now, you can login in your ZKBio CVConnect Platform.

**Figure 19 ZKBio CVConnect Login**

After logging in, we can check the status of the current cloud connection, "Online" means the cloud connection is normal. Now please save this QR code, you need to scan it when you log in the app.

**Figure 20 Organization's Code**

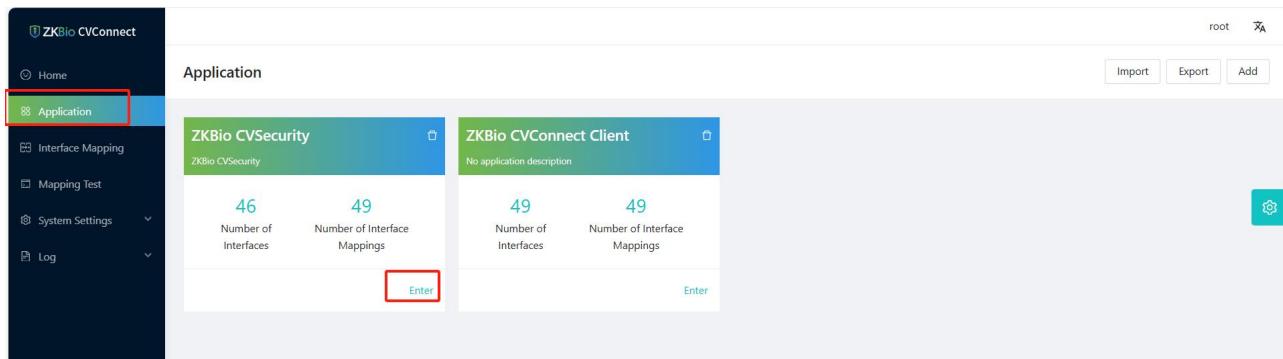

**Note:** The ZKBio CVSecurity Platform is primarily reserved for custom developers, so there is no need for you to modify the configuration or devote significant attention to it.

## 1.3 Bind ZKBio CVSecurity to ZKBio CVConnect

This step explains how to bind the ZKBio CVConnect you just activated with ZKBio CVSecurity.

Please note: If you have already entered the correct Endpoint of the ZKBio CVSecurity/ZKBio CVAccess server in [Select Area](#), you can **skip Step 1** directly.

**Step1:** Go to ZKBio CVConnect page, click **Application** -> Select **ZKBio CVSecurity**. Click **Enter**.

Click the **Edit** button in the upper right corner to modify the server address of ZKBio CVSecurity to the one you are currently using, then click **OK** to save.

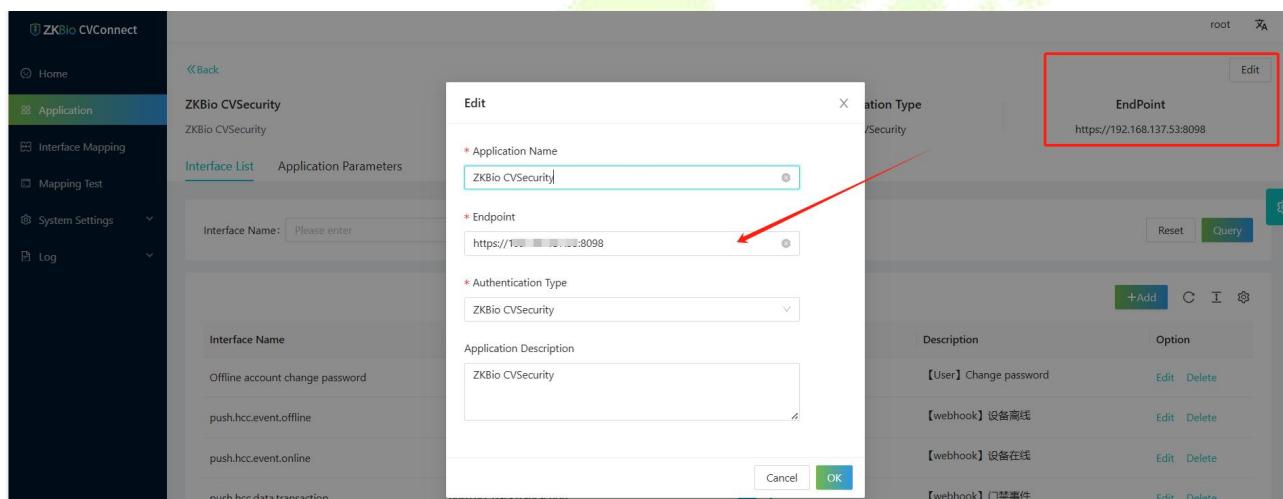

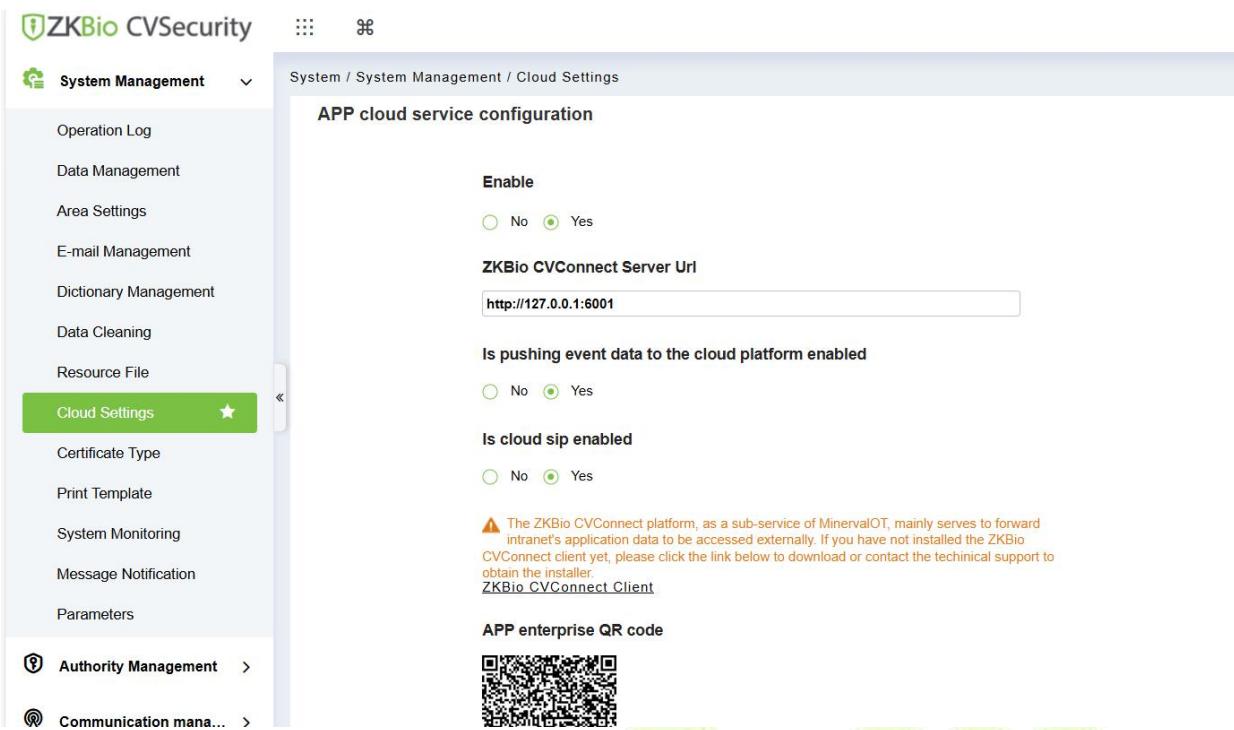

Figure 21 Cloud Setting

**Step 2:** Go to ZKBio CVSecurity web, enter **System** -> **System Management** ->**Cloud Setting**, to enable the APP cloud service.

**Figure 22 Cloud Setting**

## Parameter Description

- **Enable:** Whether to enable hybrid cloud services, enabling them allows users to start using the Mobile APP.
- **ZKBio CVConnect Server URL:** The address of the ZKBio CVConnect Client that you need to bind.
- **Is pushing event to the cloud platform enabled:** Whether to store data on the cloud platform, the default is No, data will not be stored in the cloud, it will only be forwarded to the APP.
- **Is Cloud SIP enabled:** Whether to enable the cloud SIP feature, after enabling it, you can configure the extension number for use in the visual intercom module.
- **APP enterprise QR Code:** The QR code for APP login generated after registering and activating in the ZKBio CVConnect.

## 2 Start Using the ZKBio CVSecurity Mobile APP

### 2.1 Mobile APP Download

Please download ZKBio CVSecurity Mobile APP from Google Play Store or iOS App Store. And then install it.

### 2.2 Login in

You can choose either administrator or personnel to log in.

Figure 23 App Login

## 2.3 Administrator Application Operation Guide

### 2.3.1 Administrator Login

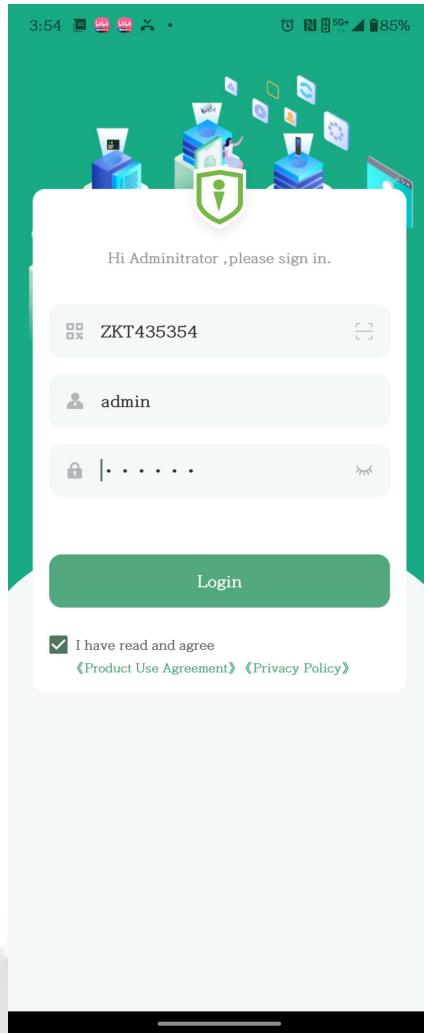

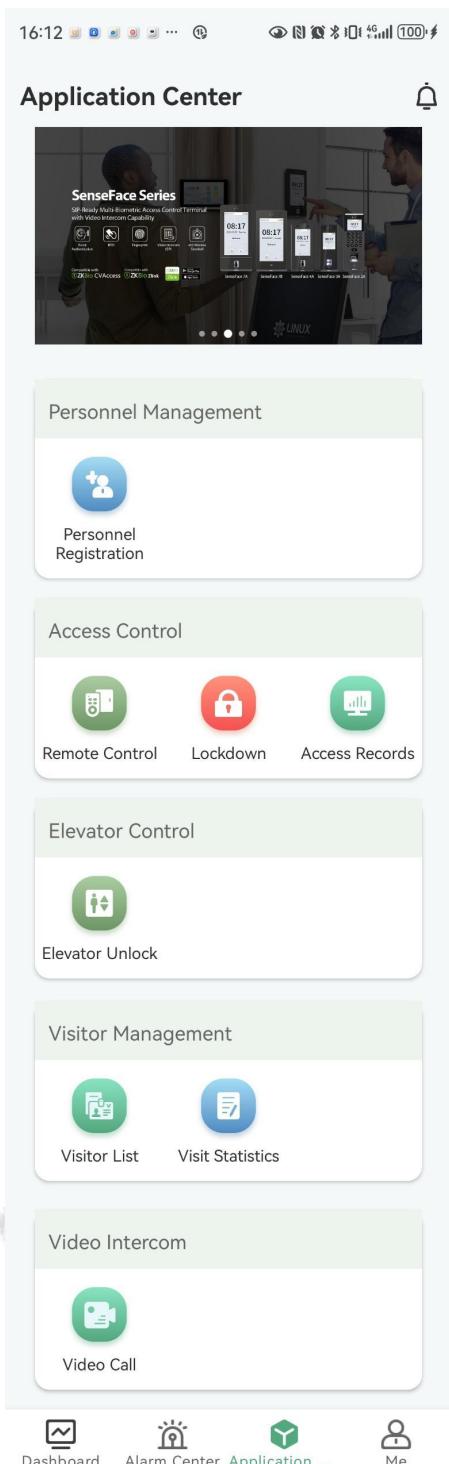

Figure 24 User Login

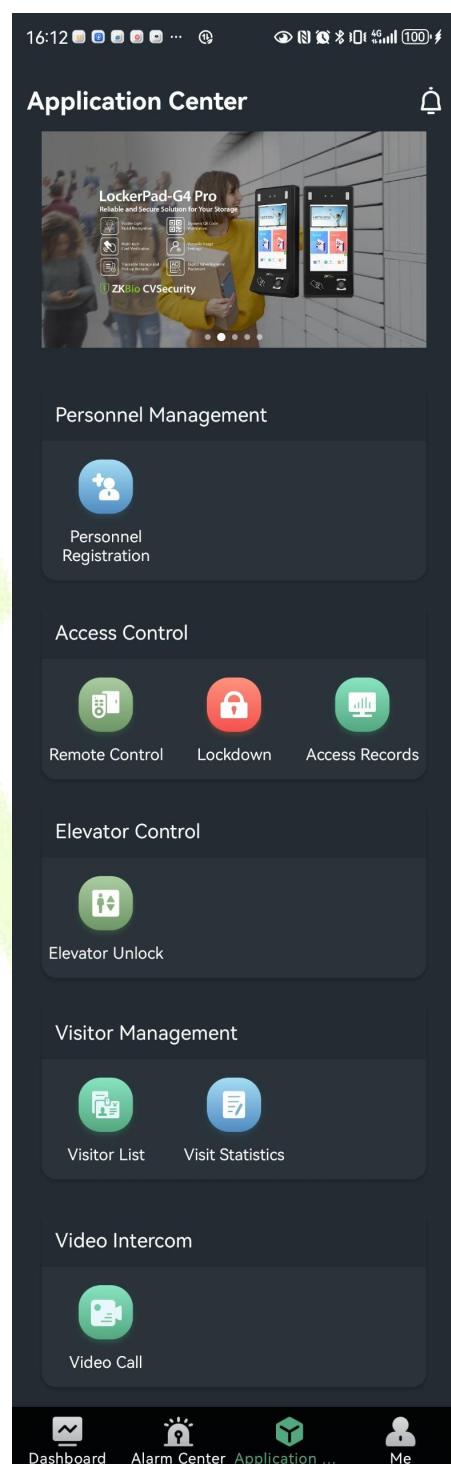

- **Organization Name:** Scan the organization code you get before. (Go to ZKBio CVSecurity web, enter **System -> System Management ->Cloud Setting ->APP enterprise QR Code**)
- **Account & Password:** The administrator account; Same account & password as ZKBio CVSecurity web.

### 2.3.2 Administrator Application Overview

**Figure 25 Light Mode**

The ZKBio CVSecurity Mobile App divided into the following modules. You can access these modules via the bottom navigation bar.

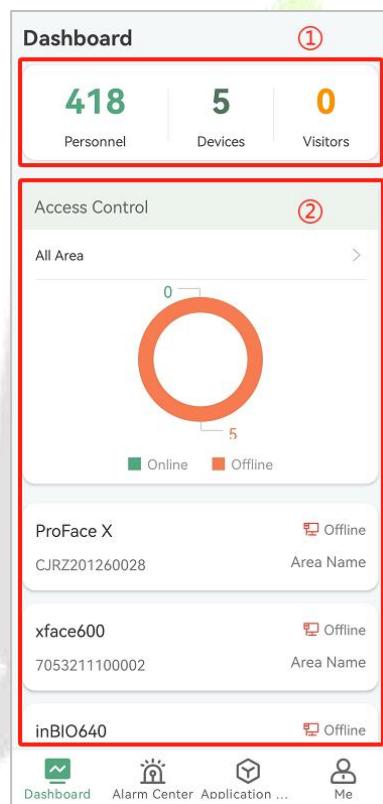

**Figure 26 Dark Mode**

Module	Description
Dashboard	You can view the status of your current resources in the Dashboard: the number of people, devices and visitors; you can also view the status of the devices.
Alarm Center	You can view all the alarm events of the day and confirm the progress in Mobile APP
Application Center	In the Application Center, you can quickly access the following modules. <ul style="list-style-type: none"> <li>Access Control: Remote Control, Lockdown, Access Records.</li> <li>Visitor Management: Visitor List, Visit Statistics.</li> </ul>
Me	You can view account information, turn on background notifications, view privacy agreements and version information.
Notification Center	View system notifications.

#### 2.3.2.4.1 Personnel Registration

This feature allows administrators to register personnel online through the APP.

***Note: This feature is available only in **version 1.2.0 and above.*****

The screenshot shows the 'Personnel Registration' screen of the ZKBio Zexus Mobile App. The top status bar indicates the time is 1:34 and the battery level is 91%. The screen has a back arrow and a title 'Personnel Registration'. The form fields are as follows:

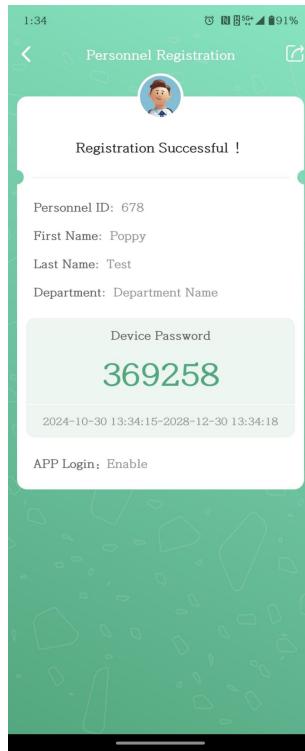

- Department\*: Department Name (dropdown menu)
- Personnel ID\*: 678
- First Name\*: Poppy
- Last Name: Test
- Email\*: 123@163.com
- Mobile Phone: Please enter phone number
- Device Password\*: 369258 (text input)
- Access Level: ResidentLevel (dropdown menu)
- Validity Period:
  - Start Time: 2024-10-30 13:34:15
  - End Time: 2028-12-30 13:34:18
- Enable APP Login
- Submit** button

**Figure 32 Personnel Registration**

**Field explanations are as follows:**

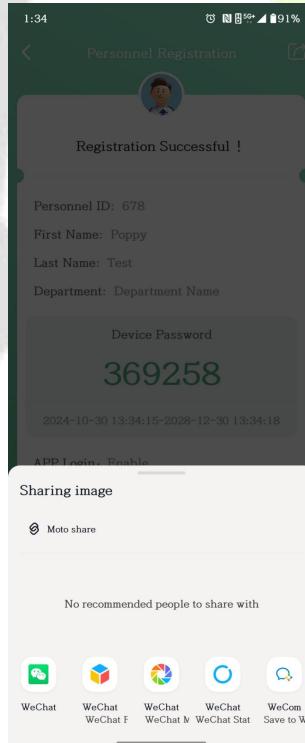

- Department: Click to select the department.
- Personnel ID: Enter the ID of the personnel.
- First Name/Last Name: Register the name of the personnel.
- Email: Register the email of the personnel.
- Mobile Phone: Register the mobile phone number of the personnel.
- Device Password: Register the access control verification password for the personnel; after registration, the personnel can use this PIN for verification on the device.
- Access Level: Grant access control permissions to the personnel.
- Validity Period: The validity period for the personnel; after expiration, verification will no longer be possible.
- Enable APP Login: Check to allow the personnel to use the APP.

The page displayed after the administrator successfully registers is as follows:

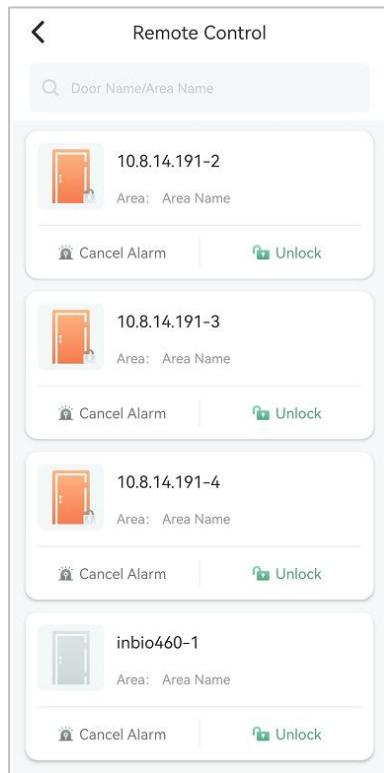

**Figure 33 Registration Successful**

You can click the button  in the upper right corner to share the successful registration information with the personnel.

**Figure 34 Sharing Image**

### 2.3.2.4.2 Remote Control

**Figure 35 Remote Control**

#### ● Cancel Alarm

Remote Cancel Alarm: When an alarm is generated, an alarm icon will appear on the left side, you can click "Cancel Alarm" to cancel it remotely.

#### ● Unlock

Remote Unlock: Remote unlocking when the device is online.

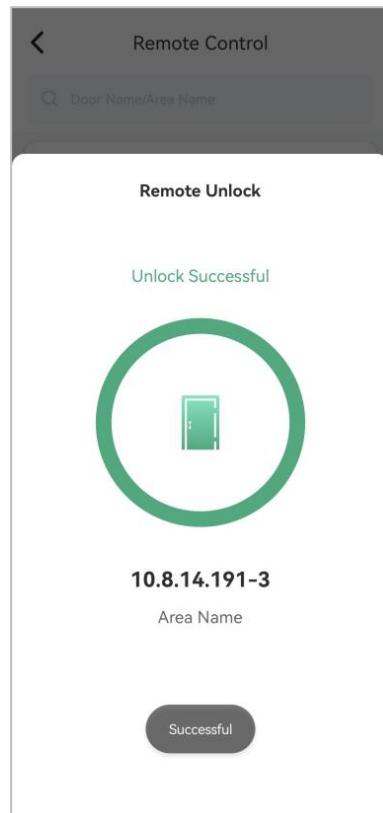

Figure 36 Remote Unlock

#### 2.3.2.4.3 Remote Lockdown

This feature is used to remotely and quickly lock doors in a preset group in case of emergency.

##### Pre-conditions:

You need the ZKBio CVSecurity preconfigured emergency lockdown group. Go to **ZKBio CVSecurity > Access > Access Control > Access Level**, to configure the lockdown group.

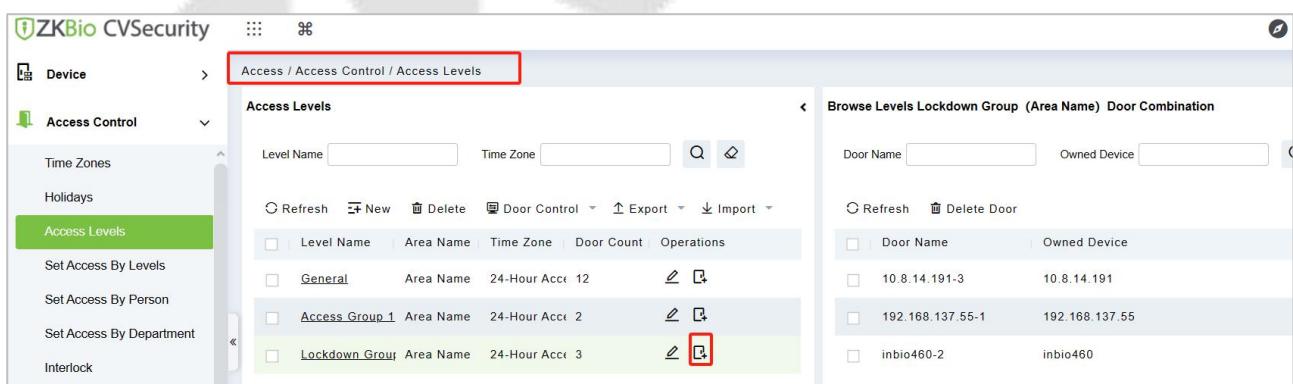

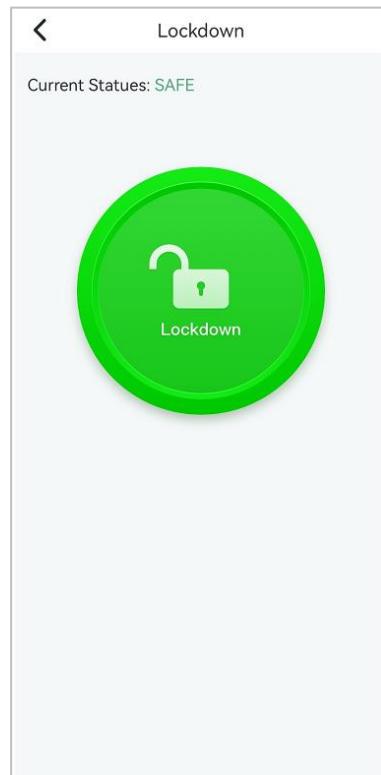

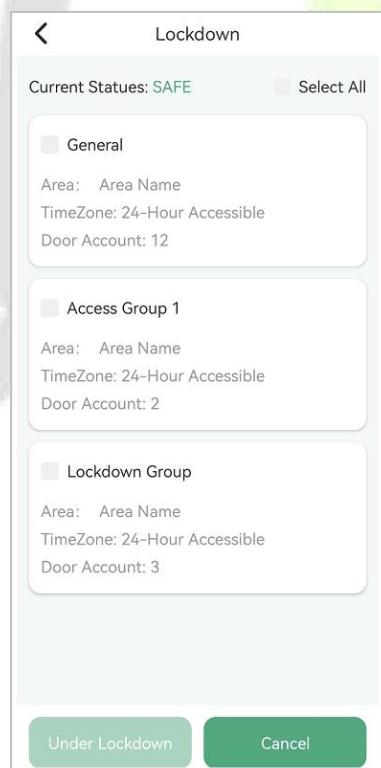

Figure 37 Lockdown Group

**Figure 38 Lockdown**

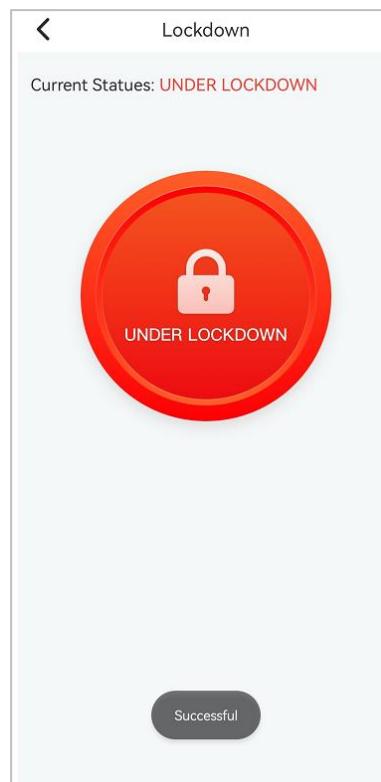

#### ● Active Lockdown

When the icon shows green, it means that the current state is safe; in case of emergency, you can click on the **green button**, select Lockdown Group, and click **Under Lockdown** button.

**Figure 39 Active Lockdown**

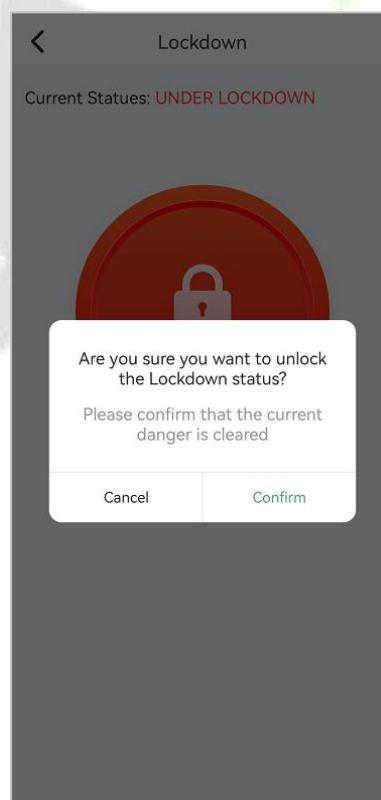

When Lockdown is activated, the button turns green and the current state changes to **Under Lockdown**.

**Figure 40 Lockdown**

#### ● Cancel Lockdown

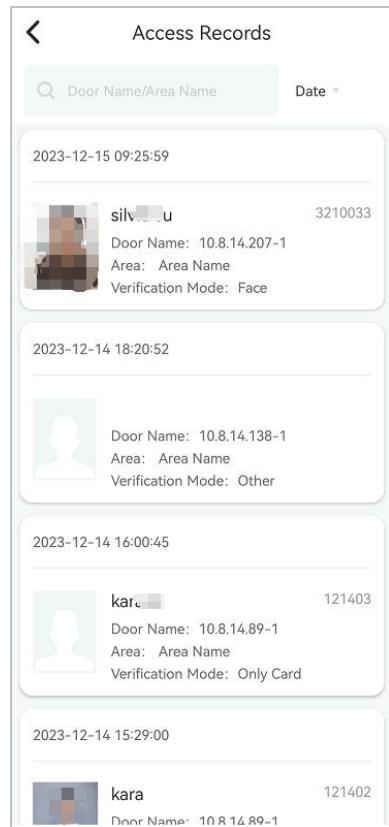

Once the alarm is cleared, click the red button to cancel the lockdown.

**Figure 41 Cancel Lockdown**

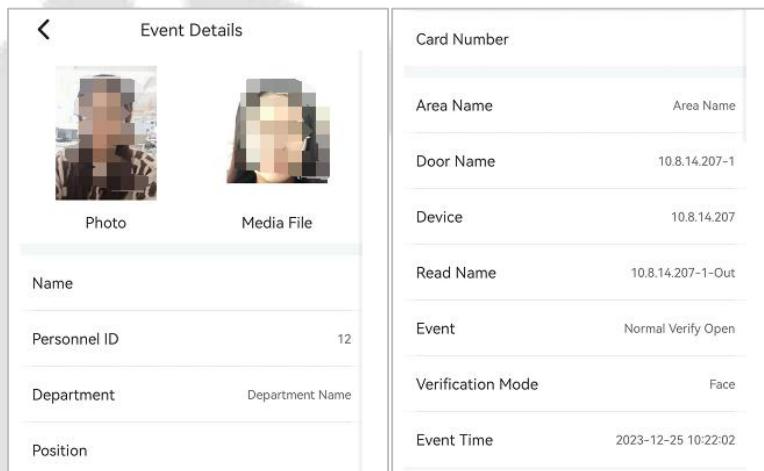

### 2.3.2.4.4 Access Records

View all door opening records.

**Figure 42 Access Records**

Click on the records card, you can view the access details.

**Figure 43 Access Details**

### 2.3.2.4.5 Visitor List

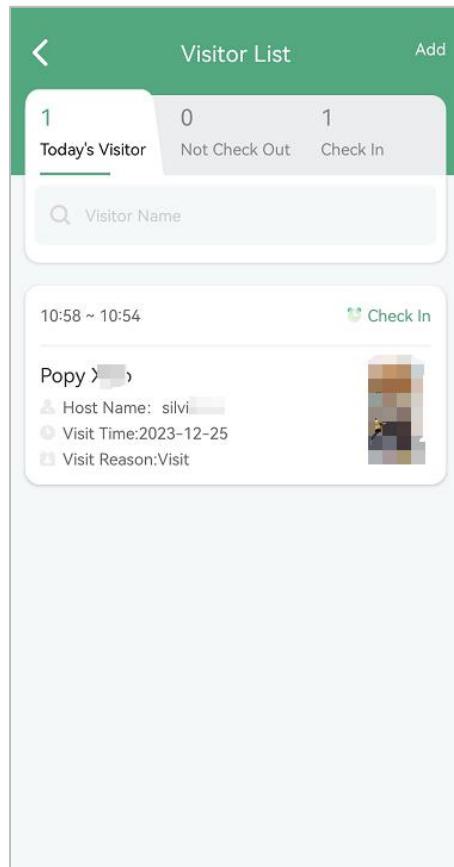

Figure 44 Visitor List

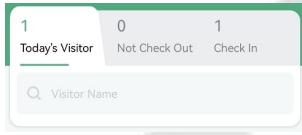

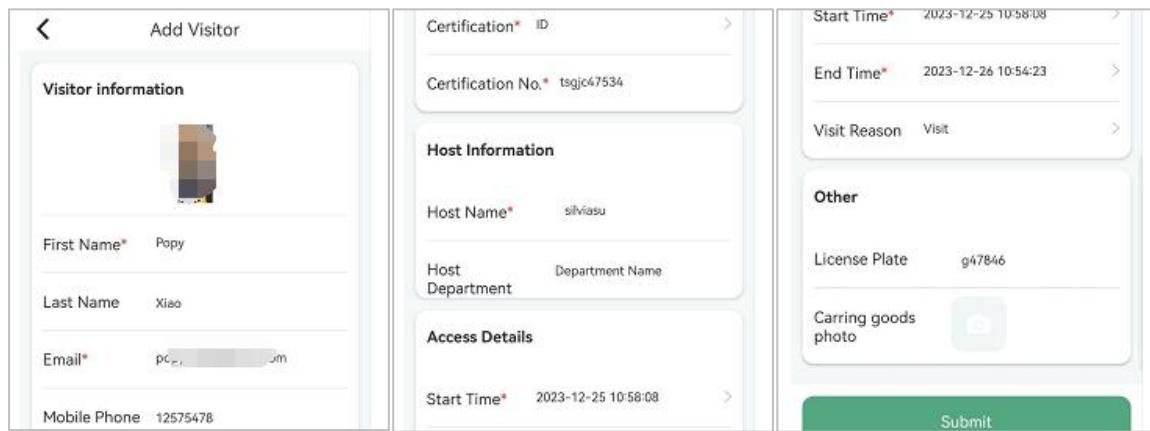

Module	Description
	<ul style="list-style-type: none"> <li>Today's Visitor Statistics Overview: Today's visitor, Not check out, Check In.</li> <li>Search by visitor name.</li> </ul>
	<ul style="list-style-type: none"> <li>Visitor visit details, including: time of visit, name of visitor, person visited, reason for visit, photo of visitor.</li> <li>Visitor Statuses: Check in/check out or not check out.</li> </ul>
	<ul style="list-style-type: none"> <li>Click Add to register a visitor, as described below.</li> </ul>

Table 6 Visitor List

The screenshot shows the 'Add Visitor' screen. It is divided into four main sections: 'Visitor information', 'Host Information', 'Access Details', and 'Other'. The 'Visitor information' section contains fields for First Name (Poppy), Last Name (Xiao), Email (poppy.xiao@zkbio.com), and Mobile Phone (12575478). The 'Host Information' section shows Host Name (silvius) and Host Department (Department Name). The 'Access Details' section shows Start Time (2023-12-25 10:58:08). The 'Other' section shows License Plate (g47846) and a placeholder for Carrying goods photo. A green 'Submit' button is at the bottom.

**Figure 45 Visitor Register**

### ● **Visitor Information**

Register basic visitor information, including name, contact information and ID number.

### ● **Host Information**

Fill in the information of the person visited by the visitor, it will be automatically retrieved when the ID or name of the person visited is entered in the input box.

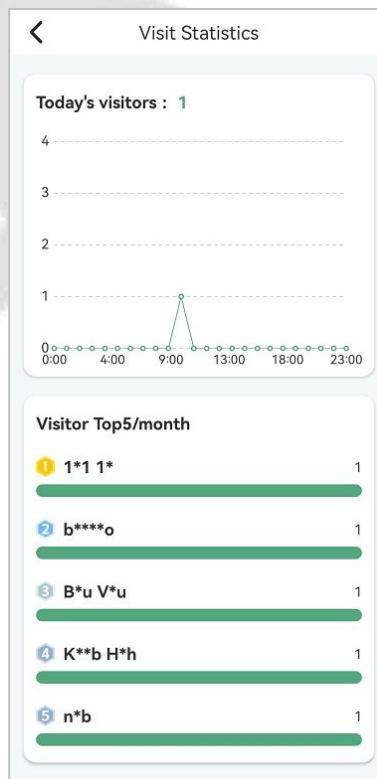

### ● **Access Details**

Time and reason for the visit.

### ● **Other**

Photographs of the visitor's license plate number or the goods he is carrying.

#### 2.3.2.4.6 Visit Statistics

## 2.4 Personnel Application Operation Guide

### 2.4.1 Personnel Login

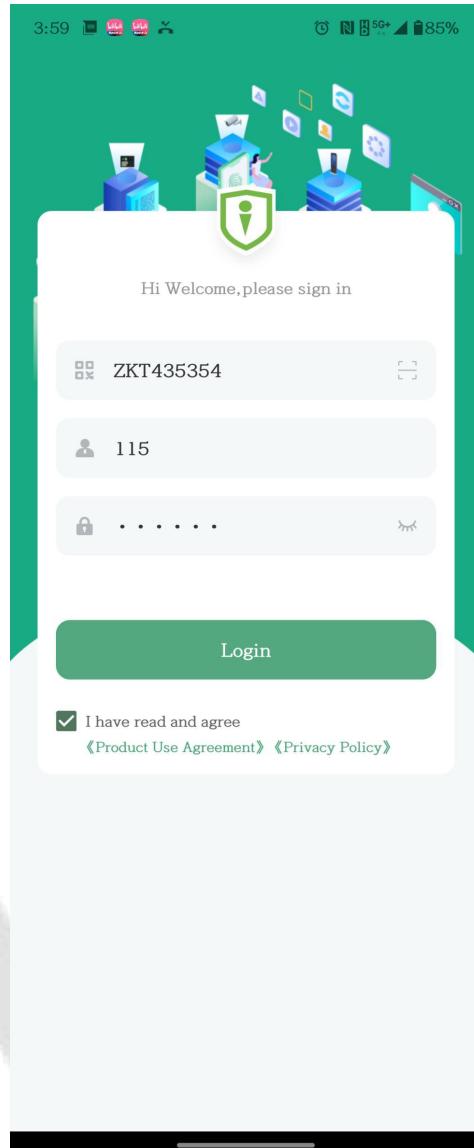

Figure 54 Personnel Login

- **Organization Name:** Scan the organization code you get before.
- **Account & Password:** The personnel ID & password; Same account & password as ZKBio CVSecurity web.

## 2.4.2 Personnel Application Overview

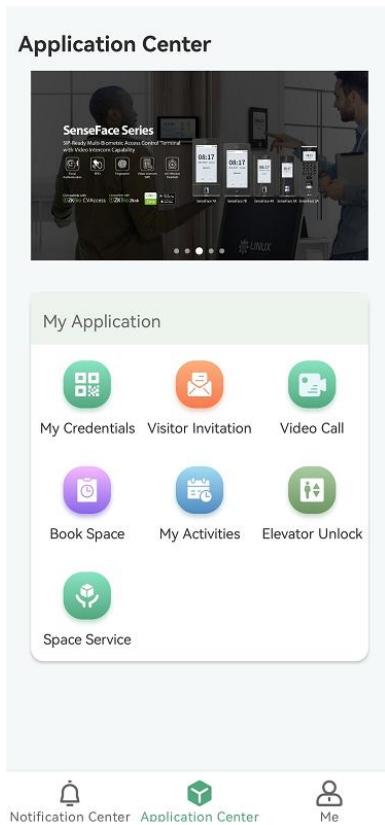

Figure 55 Light Mode

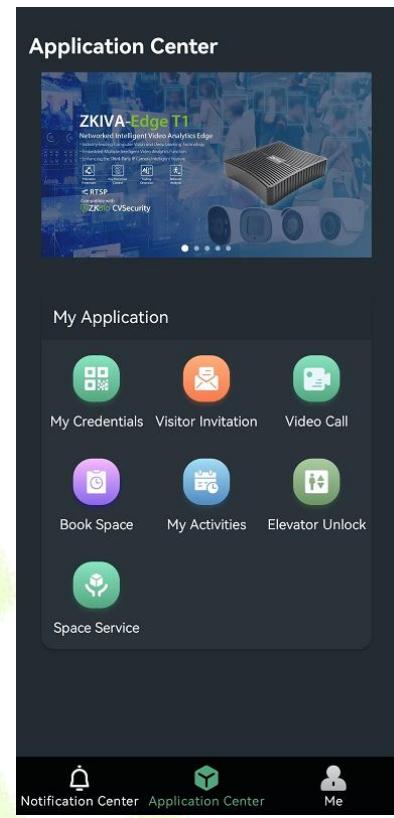

Figure 56 Dark Mode

### 2.4.2.1 Notification Center

Display all notifications for the personnel, including the following types: Informed Message, Visitor Dynamics, Access Records.

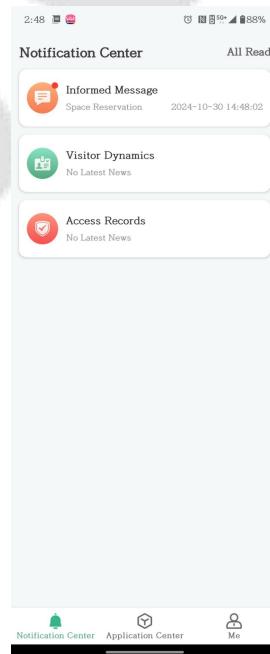

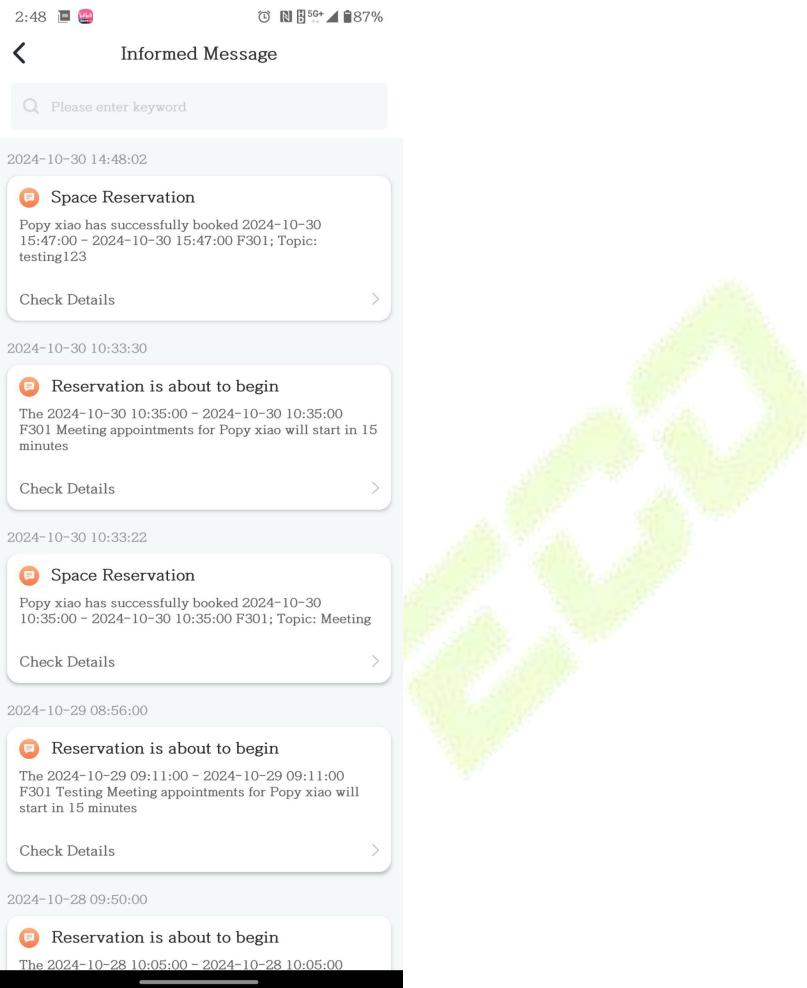

Figure 57 Notification Center

## ● Informed Message

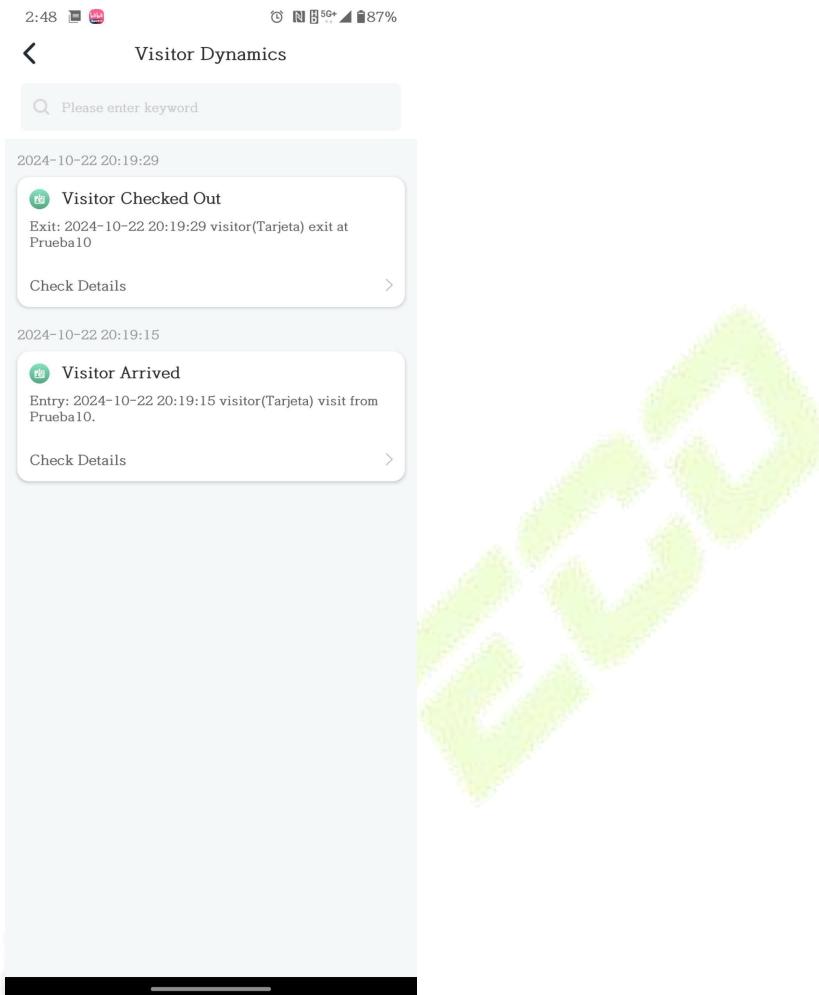

Displays notifications related to space reservations, meeting start reminders, meeting cancellations, and other relevant alerts.

**Figure 58 Informed Message**

## ● Visitor Dynamics

Displays notifications related to visitor check-ins, check-outs, and other visitor-related alerts.

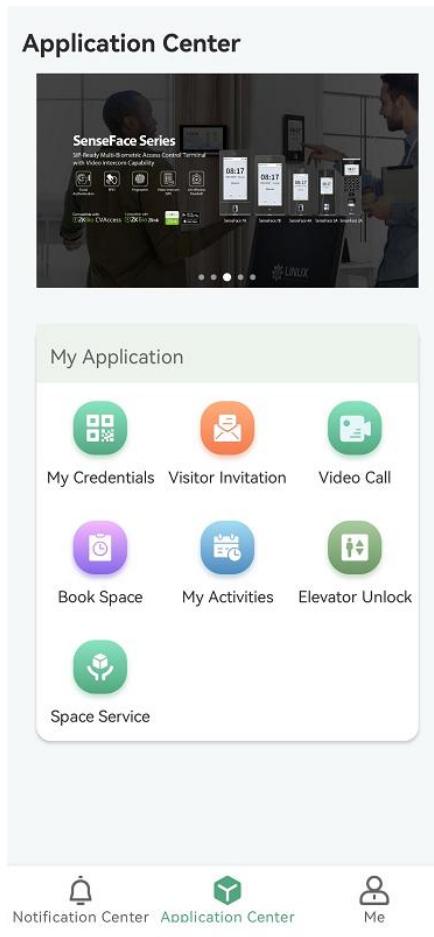

**Figure 59 Visitor Dynamic**

## ● Access Records

Displays personal verification records; after verification on the access control device, the APP will be able to query this verification message.

### 2.4.2.2 Application Center

**Figure 60 Application Center**

#### 2.4.2.2.1 My Credentials

Dynamic QR codes can be verified on access control devices.

Figure 61 My Credentials

#### 2.4.2.2.2 Visitor Invitation

##### ● My Invitation Records

Show your invitation history, click the **Re-Invitation** button to quickly invite the visitor.

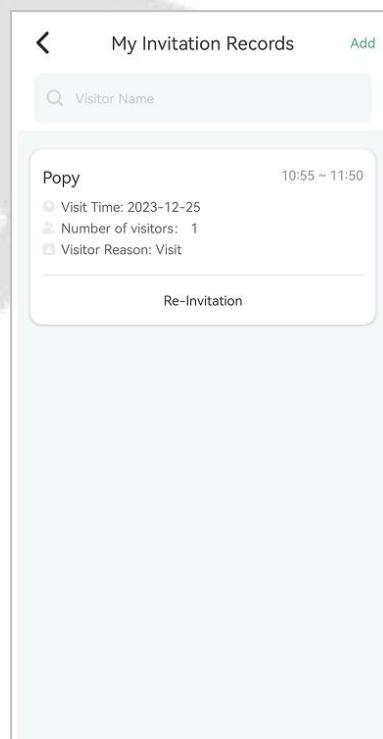

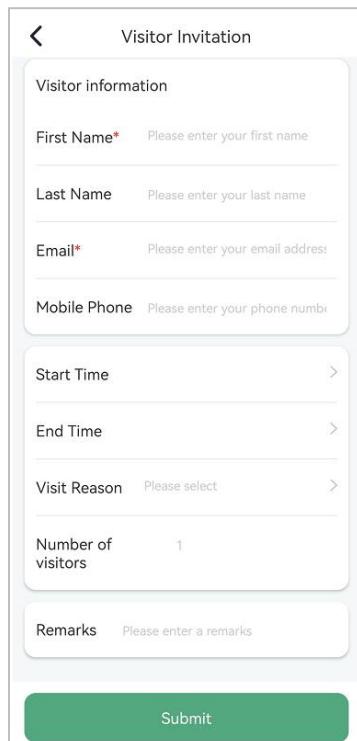

Figure 62 Visitor Invitation Records

### ● **Invite Visitor**

Click the **Add** button to fill in visitor information.

The image shows a mobile application screen titled 'Visitor Invitation'. The screen is divided into two main sections: 'Visitor information' and 'Visit details'. The 'Visitor information' section contains fields for 'First Name' (with placeholder 'Please enter your first name'), 'Last Name' (placeholder 'Please enter your last name'), 'Email' (placeholder 'Please enter your email address'), and 'Mobile Phone' (placeholder 'Please enter your phone number'). The 'Visit details' section contains fields for 'Start Time' and 'End Time' (both with placeholder 'Please select'), 'Visit Reason' (placeholder 'Please select'), and 'Number of visitors' (set to 1). Below these fields is a 'Remarks' section with placeholder 'Please enter a remarks'. At the bottom is a large green 'Submit' button.

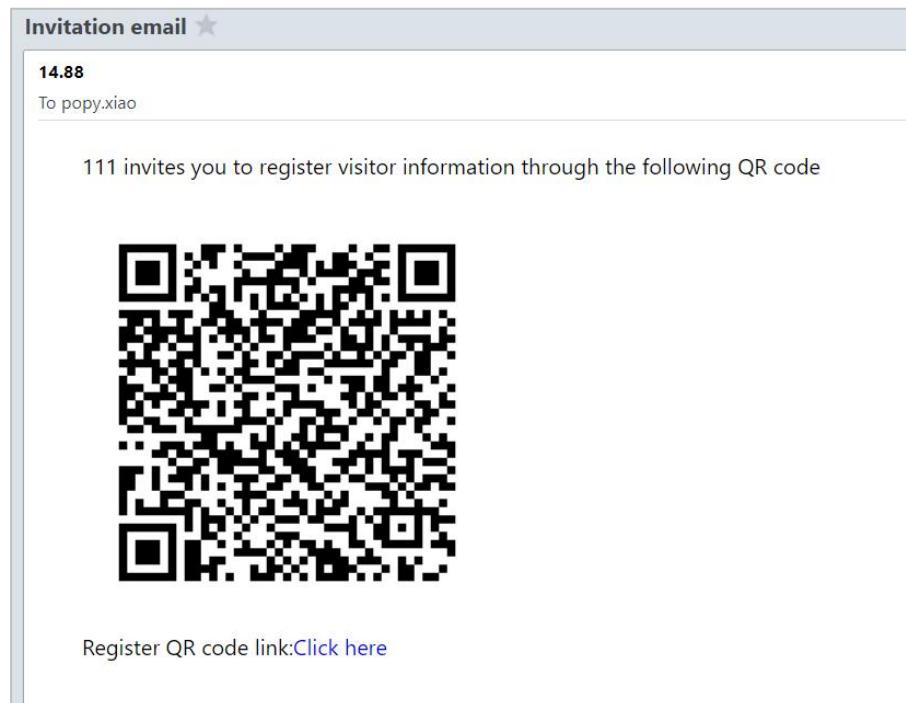

**Figure 63 Visitor Invitation**

After clicking the **Submit** button, the page jumps to the visitor invitation success screen.

**Figure 64 Invitation**

You can take a screenshot of this page and send it to your visitor, or the system will automatically send an email to the visitor.

**Figure 65 Visitor Email**

**Note:** The visitor invitation QR code can only be used once, if the visitor has already scanned the code and registered, the QR code will not be scanned again.

#### 2.4.2.2.3 Video Call

Real-time video calls allow for mutual communication between neighbors or to the property management or control center, enabling seamless communication even if you are thousands of miles apart.

Please refer to the function description in [Video Call](#).

#### 2.4.2.2.4 Elevator Unlock

Remotely release the floor buttons for your relatives or friends to start a convenient elevator riding experience.

Please refer to the function description in [Elevator Unlock](#).

#### 2.4.2.2.5 Book Space

Personnel can check the usage status of spaces through the APP and book a suitable space accordingly.

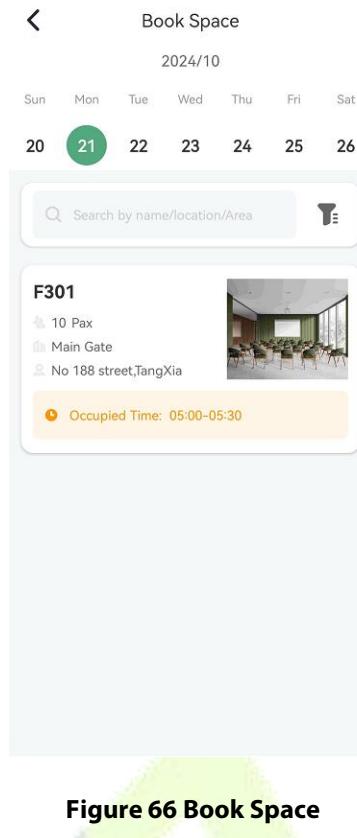

Figure 66 Book Space

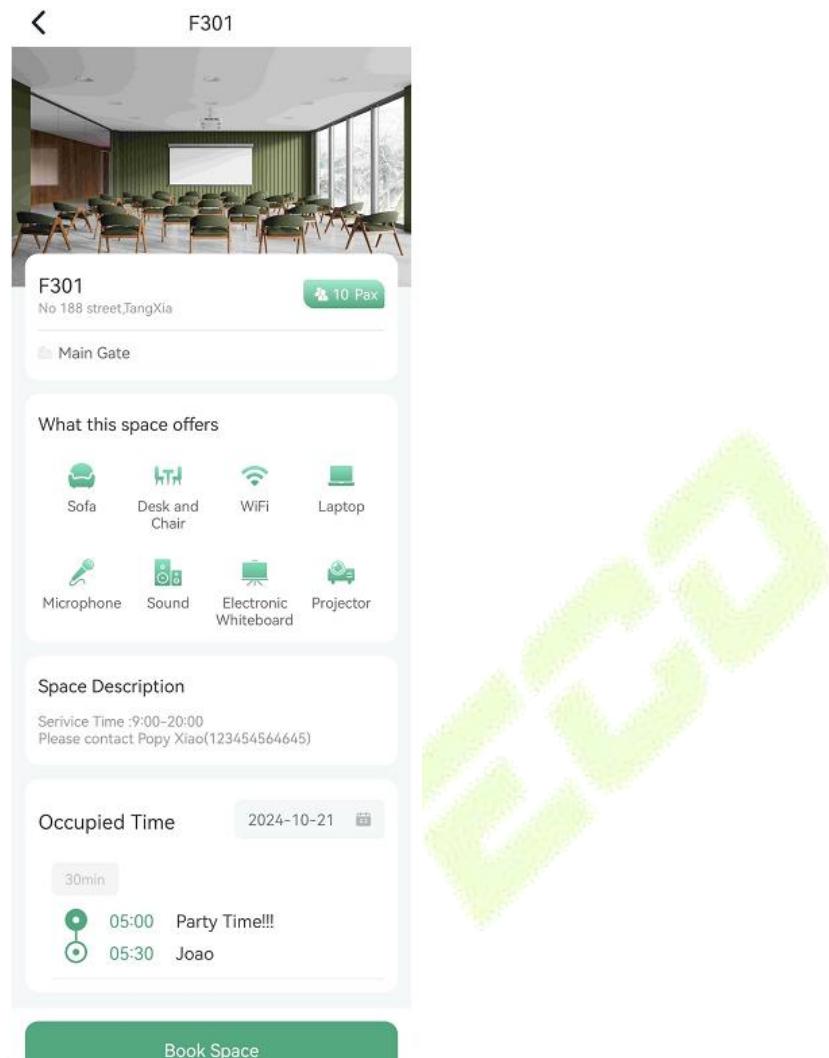

Module	Description
2024/10 Sun Mon Tue Wed Thu Fri Sat 20 21 22 23 24 25 26	You can select a date, with the default display set to only show dates from the current week. You can swipe down or right to display more dates.
	You can enter text in the search box to perform a search, or click the filter icon to filter for more options.
	Display all the information and status of spaces for that date; click on the card to view the details of the space and make a reservation.

Table 11 Book Space

## ● Book Space

Clicking on the space card allows you to view the details of that space, as shown in the figure below:

You can view the basic information of the space, its capacity, available facilities, announcements, and occupied time slots, etc.

**Figure 67 Book Space**

Click the **Book Space** button to jump to the space reservation interface, as shown in the figure below.

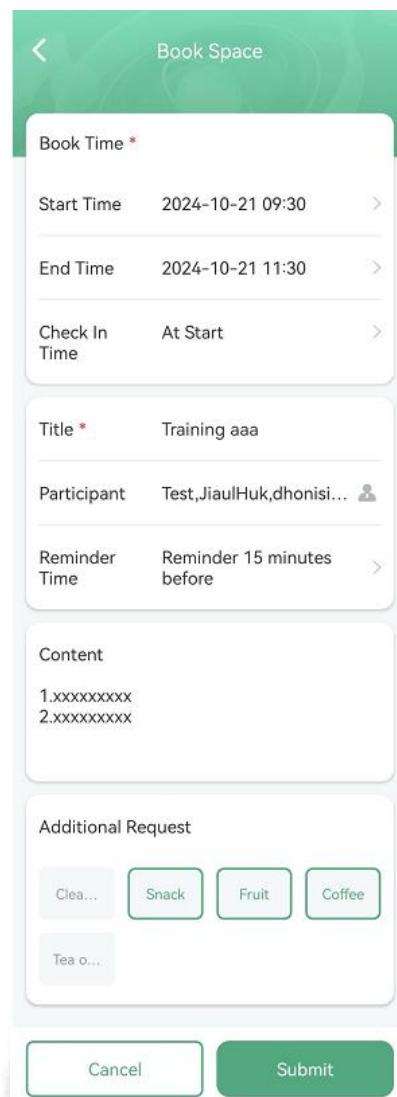

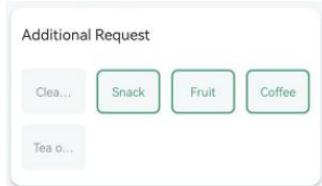

Figure 68 Book Space

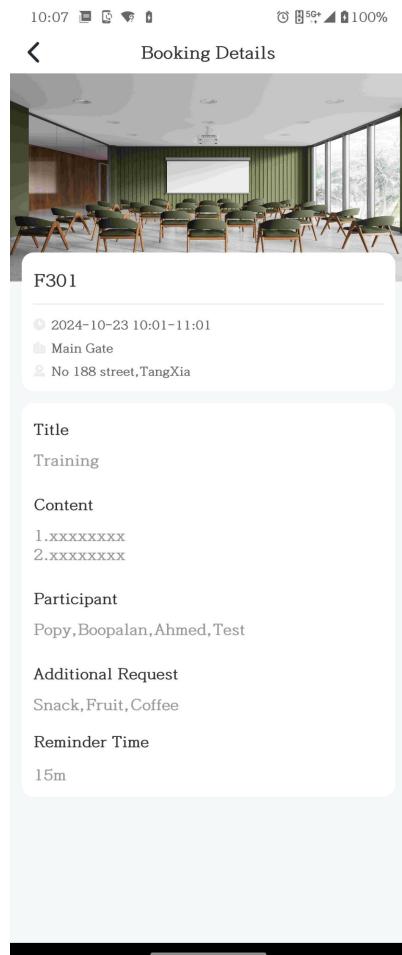

Module	Description
<p>Book Time *</p> <p>Start Time 2024-10-21 09:30 &gt;</p> <p>End Time 2024-10-21 11:30 &gt;</p> <p>Check In Time At Start &gt;</p>	<ul style="list-style-type: none"> <li>● Start Time: The time when the reservation begins.</li> <li>● End Time: The time when the reservation ends.</li> <li>● Check In Time: The time when you can check in on the Facekiosk H10A device after a successful reservation.</li> </ul>
<p>Title * Training aaa</p> <p>Participant Test, JiaulHuk, dhonisi... &lt;img&gt;</p> <p>Reminder Time Reminder 15 minutes before &gt;</p>	<ul style="list-style-type: none"> <li>● Title: The theme for reserving the use of the space.</li> <li>● Participant: Select participants; after a successful reservation, they will receive reminders, and only participants can verify on the device.</li> <li>● Reminder Time: The time for a follow-up reminder.</li> </ul>
<p>Content</p> <p>1.xxxxxxxxx 2.xxxxxxxx</p>	The content for reserving the use of the space, such as the meeting agenda.

	Indicates whether additional services are needed. After selecting the appropriate services, the space manager will receive a corresponding reminder and provide the services.
---	---

**Table 12 Book Space**

The interface after a successful reservation is shown as follows:

**Figure 69 Book Space**

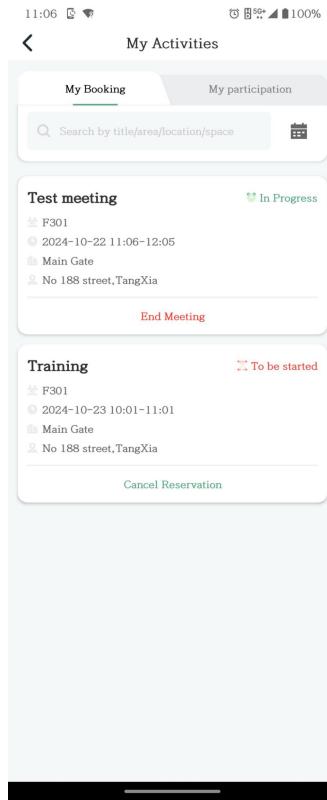

**Figure 70 Book Details**

#### 2.4.2.2.6 My Activities

This application primarily displays the events I have reserved and the events I am participating in.

##### ● My Booking

Displays the status of the activities I have booked, including: "To be started" "In Progress" "Finished" "Has been canceled".

**Figure 71 My Booking**

### ■ End Meeting

When the current activity status is "In Progress," the applicant can click the "End Meeting" button to conclude the meeting ahead of schedule. The time for which the meeting is ended early will be released and become "Available."

### ■ Cancel Reservation

When the current activity status is "To be started," the applicant can click the "Cancel Reservation" button to cancel the reservation. After cancellation, the entire reserved time slot will be released and become "Available."

## ● My Participation

This section is used to display the activities I am involved in. When this person is selected as a participant during space reservation, the activity schedule will be displayed on the individual's My Participation interface. As shown in the figure below:

Note: Only the applicant can perform operations to cancel and end; participants cannot operate.

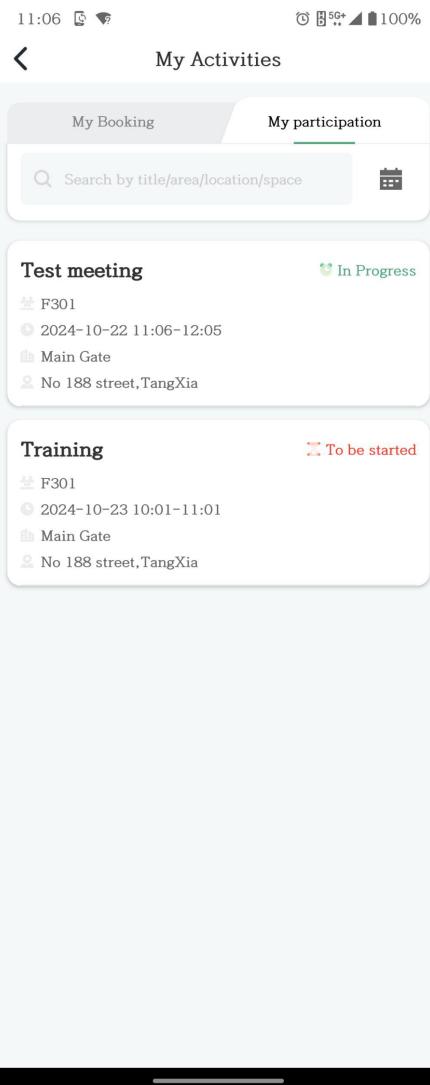

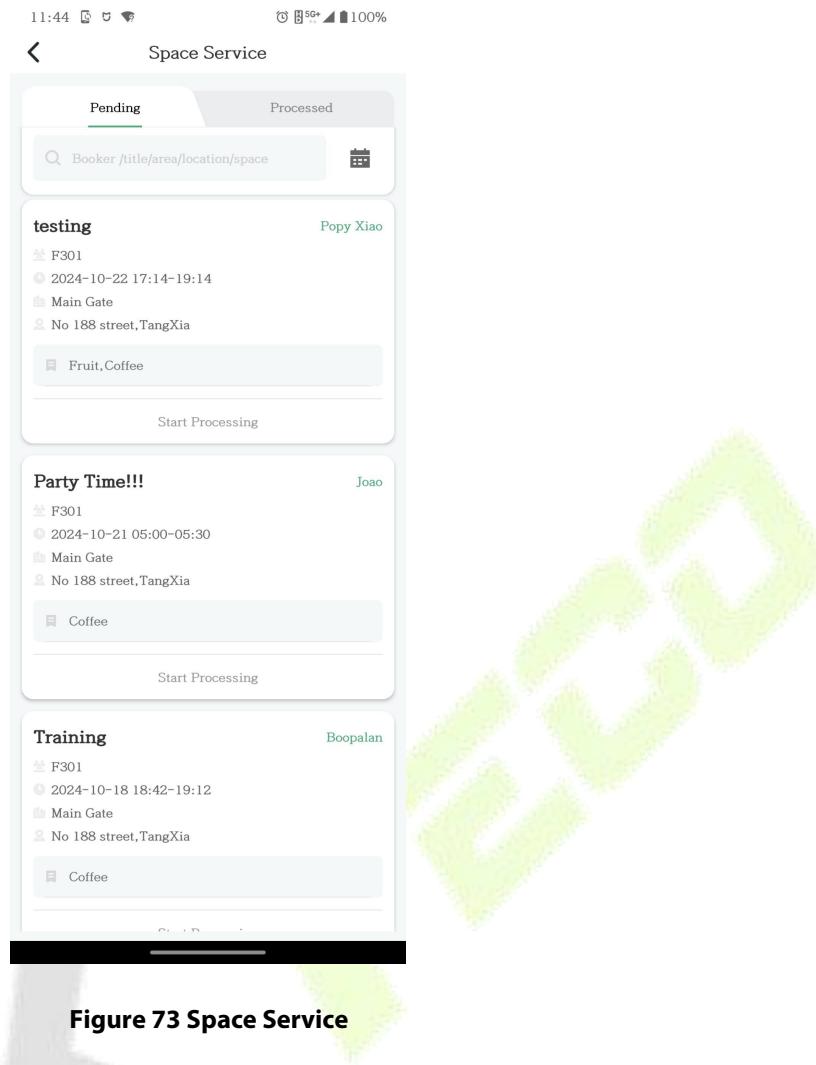

Figure 72 My Activities

#### 2.4.2.2.7 Space Service

This application is accessible only to space administrators with the necessary permissions.

##### ● Pending

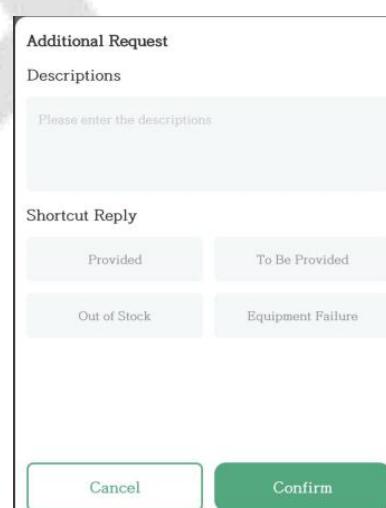

The space administrator can view all reservation statuses for the space as well as the requests submitted by applicants.

**Figure 73 Space Service**

The space administrator can handle the requests made by applicants by clicking "Start Processing" to enter the following interface:

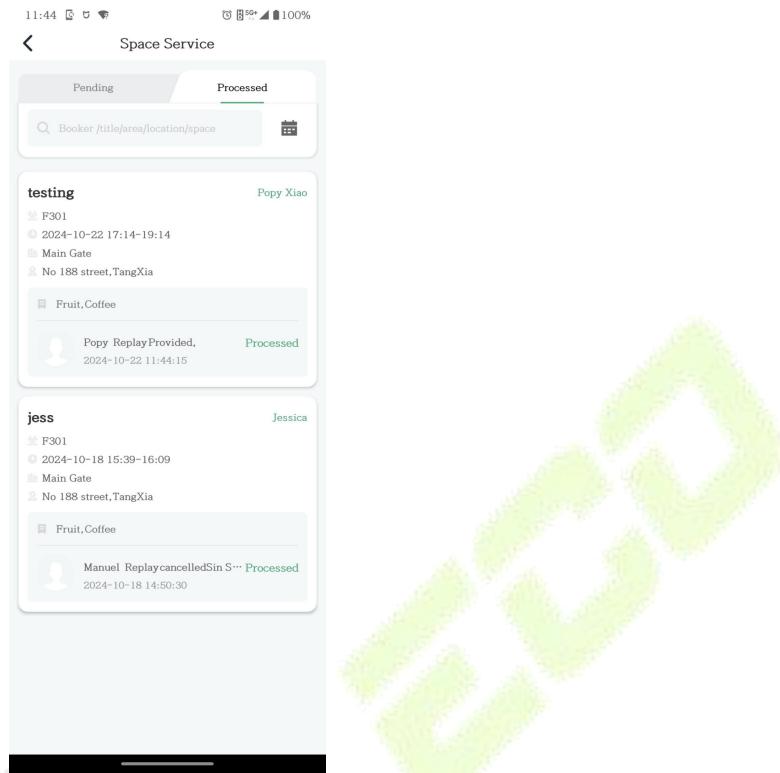

The space administrator can then respond based on the service content.

**Figure 74 Space Service**

## ● Processed

Replied space services can be viewed in the "Processed" section.

**Figure 75 Space Service**

### 2.4.2.3 Me

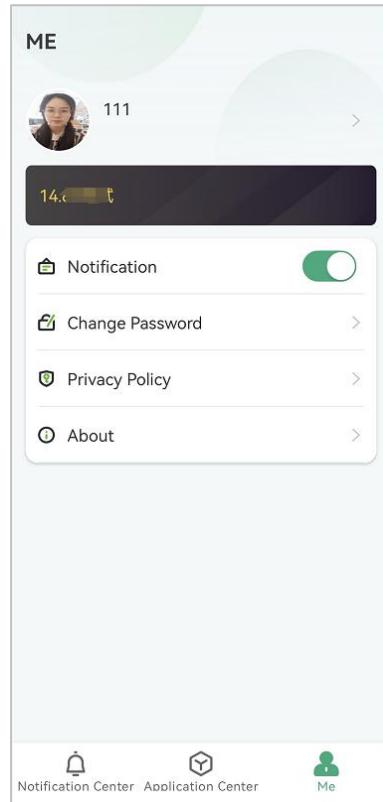

Figure 76 Me

Module	Description
	Personnel information, After clicking, you can view personal information. Currently, only personal avatar modification is supported. Users can upload facial photos for device verification.
	Current organization name.
	Enable the background message notification button on mobile, when enabled, the background can receive message alerts.
	Change personnel passwords; after the change, the ZKBio CVSecurity Web personnel self- login passwords will be changed accordingly.
	Privacy Policy.

Table 13 Me

## FAQ

### Q1: What languages does ZKBio CVSecurity support? How do I switch languages?

**A1:** Version 1.2.0 supports 12 languages, which are:

- English
- Spanish
- Chinese
- Thai
- Indonesian
- Vietnamese
- Portuguese
- French
- Romanian
- Polish
- Italian
- Russian

**Note:** If you need to switch languages, please go to your phone's system settings under **Language**; the language of the Mobile APP will switch according to the language set in your phone's system.

### Q2: What skins are currently supported? How do I switch skins?

**A2:** Currently support light mode and dark mode; follow the mobile system to switch the display mode.

### Q3: When I select Personnel login, I enter my Personnel ID and password and it says "Unauthorized APP login".

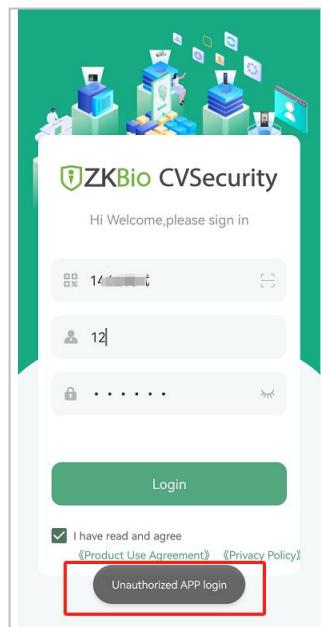

Figure 77

**A3:** Please contact your administrator and enable App Login for these personnel; select the personnel on the ZKBio CVSecurity web page, click **More >Enable App Login**.

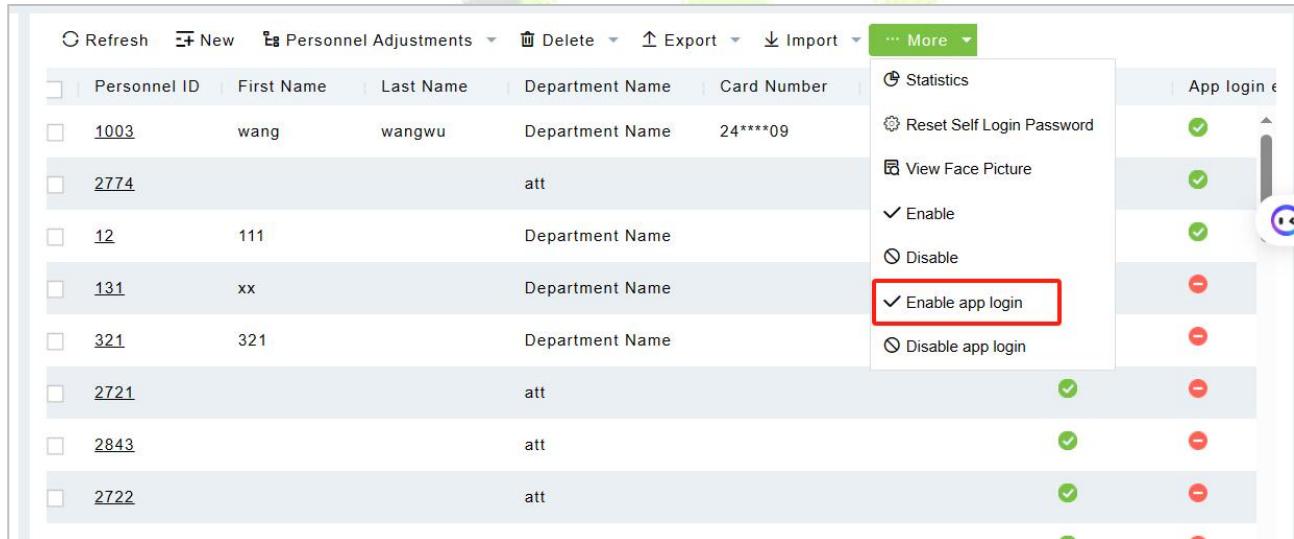

Figure 78

**Q4: When I test to use “visitor invitation”, there show “system error”, how can I do?**

**A4:** This is because visitor invitations require the use of the system's Email notification service, so you need to first configure the mail server on the **ZKBio CVSecurity web page >System > System Management > Email Management > Outgoing mail server setting**.

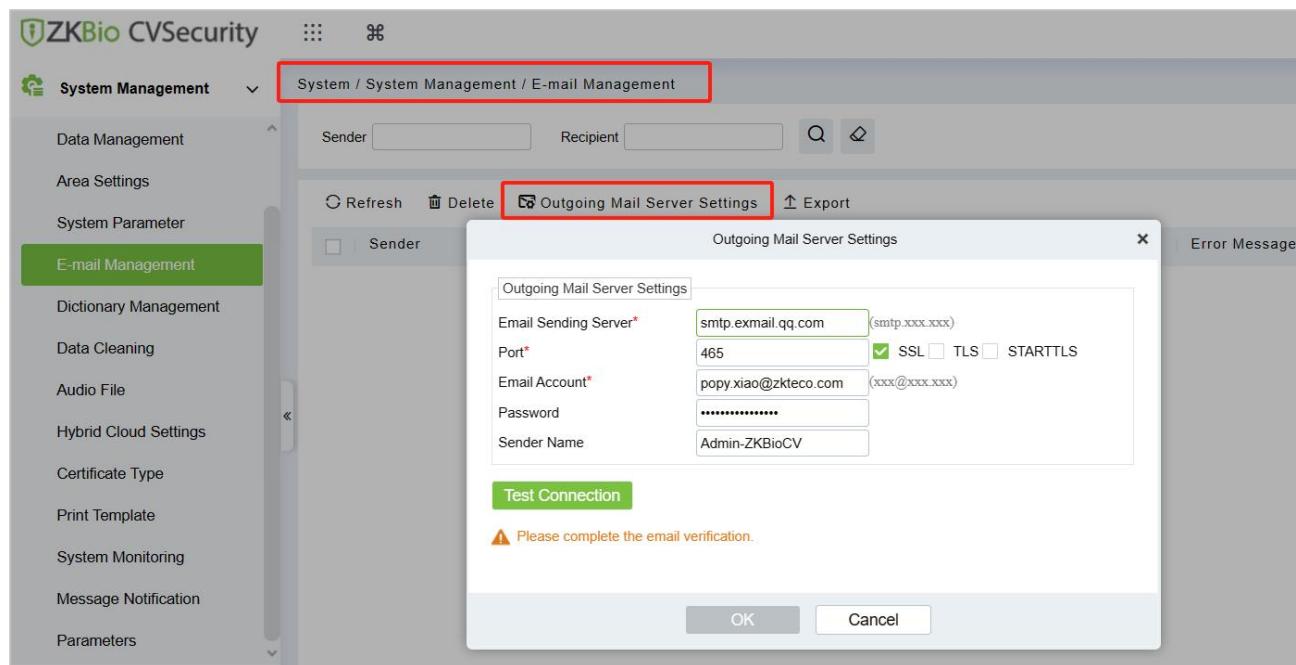

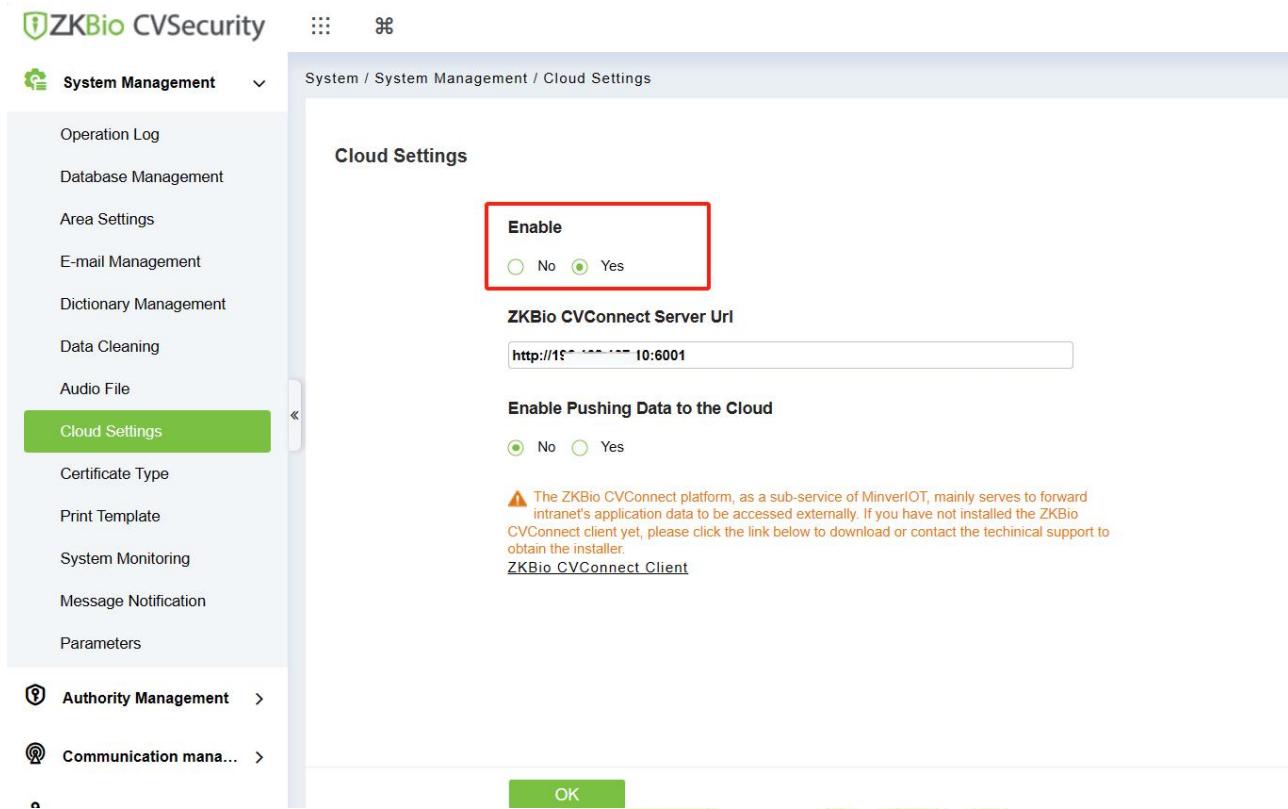

Figure 79

#### Q5: Why doesn't the APP have real-time message notifications?

**A5:** To enable alarm and message push notifications, you will need to go to **ZKBio CVSecurity -> System Management-> Cloud Setting** and enable the cloud service (As shown in the figure below). This will allow real-time push notifications of alarms and messages to the APP.

**Note:** If the current software does not have this menu, please confirm whether you have enabled the Service Center module. If not, please enable it from the **console** and then restart the service to refresh.

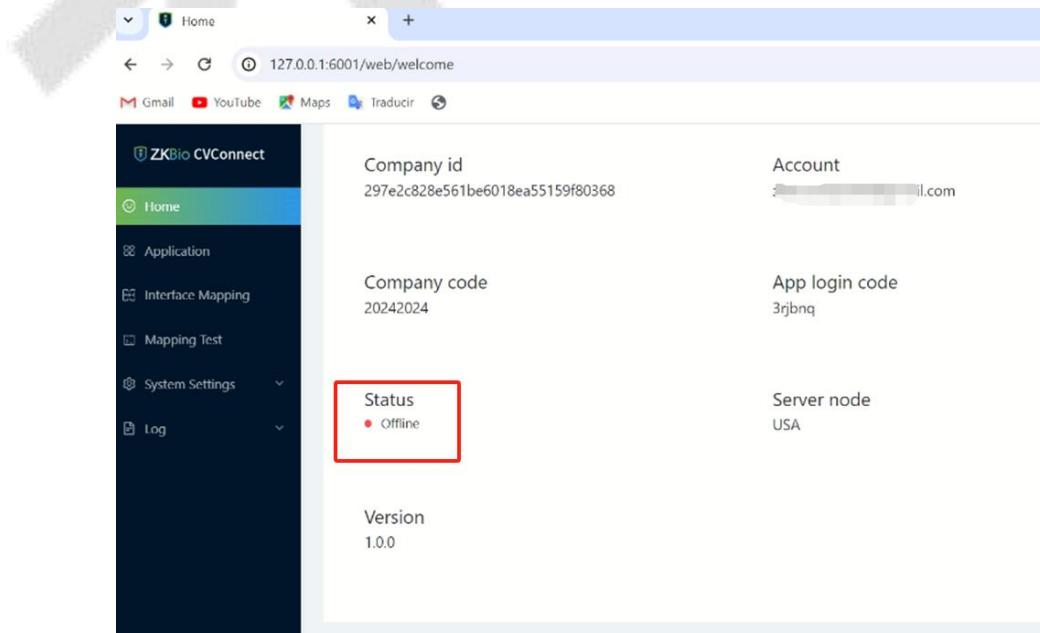

**Enable:** After selecting "Yes," real-time alarm and message notifications will be pushed to the APP. Even when the APP is running in the background, the phone will still be able to receive notifications.

**ZKBio CVConnect Server Url:** Enter the server address for ZKBio CVConnect, the local address will be filled in by default;

**Enable Pushing Data to the Cloud:** Once enabled, device information (device name, status, firmware version) and event logs will be pushed to the cloud.

#### Q6: What should I do if the status of my ZKBio CVConnect is showing as Offline?

**A6:** Please go to the **Task Manager - Services**, find the **ZKBio CVConnect service**, and **restart** it.
