Safety Caution

1. The factory setting for all new locks can be opened by ANY fingerprints.
2. Please register at least one administrator for the new installed lock. The lock cannot register any normal users without an administrator.
3. The lock is equipped with mechanical keys for manually unlocking. Please keep the mechanical keys in the safe place.
4. To power on the lock, eight alkaline AA batteries (not included) are required. Non-alkaline and rechargeable batteries ARE NOT RECOMMENDED.
5. Do not remove batteries when the lock is in working state.
6. Please replace the battery soon when the lock prompts the voice of low battery.
7. There are 7 seconds stand-by time limits for all setting operations, without any activity within the time limits, the lock will automatically shut off.
8. Keep your fingers clean when using this lock.

### Initialization

Initializing the lock means all data will be deleted and restored to factory default setting.

**Operation Instruction:** Press the reset button, then touch the keypad to power on the
lock, and holding the reset button for 5 seconds until the lock prompts the voice of “Restore to default settings, wait a moment”. After around 30 seconds, the lock prompts the voice of “completed”, and then the initialization is finished completely.

Random Password

Random password = random digits + correct password + random digits. Users may enter any random digits in front of and behind the correct password to create random password to open the door. The maximum length of the random password is 32 digits.
For example: If the correct password is 123456, the random password can be 89123456807, 1234562363, 389123456, etc.

Voice Guide

After access into the menu, the lock will prompt voice before and after each operation. It is quite easy for user to know how to operate each step.
Normal Open

Normal open mode is to keep lock always unlocked, which is fit for meeting room and some places free to in or out.

User Data Synchronization

The user data can be downloaded/uploaded via U-disk from one lock to other locks, it will help users to save time in some repeated registrations.

Low Battery Alarm

When the lock is in low battery status, it will trigger the alarm with the sound of short beep and the voice of “Battery is low, please replace”. After triggering low battery alarm, the lock will be out of battery in approx. 200 operations.

Note: Access to operation steps is not allowed in low battery status.
Anti Break-in Alarm

The anti break-in alarm is closed at default. Push switch inside the front lock to turn on the alarm. After that, when the front lock is disassembled forcibly from the door, it will trigger the alarm with three “short beeps” constantly.
Security Deadbolt

The mortise of this lock has two security deadbolt, one is big deadbolt that is used to lock the door from both outdoor and indoor, the other is small deadbolt that is used to lock the door from indoor.

9V External Battery

9V external battery is used to open door when the lock is out of battery.

Note: The above battery must be 9V alkaline battery (6LR61).
Emergency Mechanical Key

The mechanical key is used to open door when the lock has electronic malfunction.

**Note:** Keep the mechanical key in a safe place.

Insert the key into key hole and rotate 90°, then press down the handle to open the door.

**Mechanical Key Instruction:**

1. Key A is coated with brass color, which is used only for lock installer and upfitter.
2. Key B is packed in the sealed plastic wrap for safety, which is used for house owner.
3. Once Key B is used, Key A will be disabled to open the lock.
How To Use

Register First Administrator

**Operating Steps**

1. Touch the keypad to power on the lock
2. Press 0 and # to access into menu
3. Enter 3 digits user number
